1. Research	I researched the role of a social worker. I looked at what social workers do, the skills they need, and some of the challenges they face when helping people. I used different websites and articles to find information. It was interesting to learn how social workers support individuals and families in difficult situations. Sometimes it was hard to decide which information was most important because there was so much to read.
2. Presenting	When I presented, I tried to explain the main responsibilities of a social worker in a clear way. I organised my points and gave examples so everyone could understand. I think my presentation went okay, but I felt nervous speaking in front of the class. Because of that, I rushed through some parts and could have explained a few points better.
3. Challenges you faced	One of the challenges I faced was managing my time. I spent a lot of time researching, so I had to make sure I also practised enough before presenting.
4. Actions to improve	To improve, I will practise speaking more slowly and clearly. I might also practise in front of friends or family to feel more confident. I will plan my time better so I can research and prepare without rushing.
5. Further steps needed to Prepare for Task 3	Further steps, I need to learn more about social work jobs and ways to support people.
