The Edible Garden

The garden taught me to slow down and
notice the little things...

Discover

Reclaimed wheels, growing dreams....

Chalk and heart in open space, a sign
of care in nature's place.

The image is a collage of three photographs. The top-left photo shows a small wooden shed with a translucent, glass-like roof, situated in a grassy field with a dense line of trees in the background. The bottom-left photo shows a young, thin tree planted in a grassy field, with a dense line of trees in the background. The right-side photo shows a tall, green plant with large leaves and a developing flower or seed head, with a wooden fence and a grassy field in the background. The text "A shed of glass in fields so wide, where hope and growth and green abide." is overlaid in white on a green background that spans the middle of the collage.

A shed of glass in fields so wide, where
hope and growth and green abide.

Among the greens, a fiery glow. Nature's way of stealing the show.

Spring Onions: Tall and thin, fresh within.

Red Cabbage: Purple pride, tucked inside.

Gooseberries: Hidden gems in leafy hems.

We made a rainbow salad together

Pumpkins: Round and bold, turning gold.

Lettuce: Crisp and green, the salad queen.

A close-up photograph of a person's open palm, which is covered in dark soil. A small, segmented earthworm is crawling on the palm. The background is a blurred green lawn.

A tickle from Sid, the
garden guest,
laughter proves
nature's the best.

Wooden frames that guide the way, where plants climb high and children play.

Moments of wonder

“I didn’t realise strawberries were green to begin with!”

“I have never dug in the soil before!”

“Is this really going to turn into a flower? That’s magic!”

“I think this plant is happy we are taking care of it!”

“I have had the best time in the garden today Miss”

“I want to plant a sunflower so it grows taller than me!”

“How does the plant know which way is up?”

“The worm looks so busy!”

Garden quiz - Produced by class 3.

Mini Garden Quiz

Test your knowledge from the garden!

1. What do plants need to grow?
 - A) Sun, water, and soil
 - B) Juice and glitter
 - C) Only sunshine
2. What is the purpose of a bug hotel?
 - A) A place for bugs to play games
 - B) A shelter for insects to live and stay safe
 - C) A space for pets
3. Which of these is a root vegetable?
 - A) Lettuce
 - B) Carrot
 - C) Apple
4. What part of the plant do we eat when we eat red cabbage?
 - A) The root
 - B) The flower
 - C) The leaves
5. Why is compost good for the garden?
 - A) It keeps the weeds away
 - B) It helps add nutrients to the soil
 - C) It makes the garden smell nice

Conserve

"A Home for Bugs, We Built with Care!"

A bug-sized home built with care —
every creature welcome there.

Reflection.

Seeds of Change

In wooden beds and reused things,
Our garden grows on borrowed wings.
Old bike wheels, a frame of wood.
Proof that less can still do good.
Hands in soil, seeds go deep,
Lessons sown we'll always keep.
Bug hotels for tiny guests,
Nature thrives when we invest.
We teach with care, with heart and hand,
To help young minds both understand,
That compost, kindness, earth and air,
Deserve our love, deserve our care.
Not all have gardens, trees, or land.
But here they learn and help it stand.
Each shoot they plant, each worm they see,
Sows roots of responsibility.
Each child plants more than they know.
A greener path begins to grow.
And in this space, so wild and free,
We grow with hope. We grow with "we."
For in each walk with nature's song,
We find the place where we belong.
And just as Muir once paused to seek,
We teach the world through hands, not speak.
