United Nation children's fund (UNICEF) works in the most critical surrounding to defend the rights of children and support children more than 190 countries around the globe. They are the leading manufacturer in the world, they support people against all odds such as clean water, high quality education, HIV prevention and child health. (<https://www.unicef.org/about-unicef>)

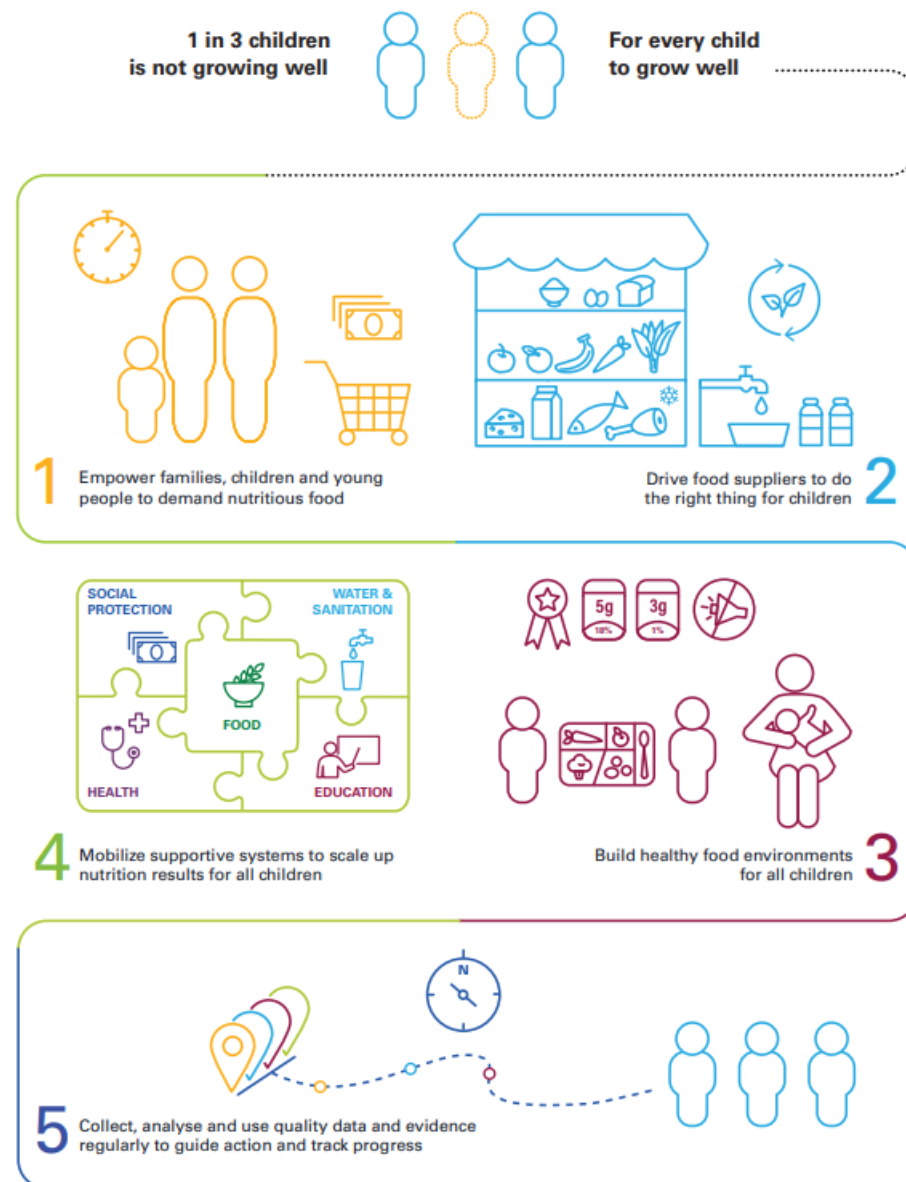

According to UNICEF health report around the globe malnutrition affects 200 million children daily lifestyle. They provide lifesaving therapeutic feeding for children and achieved proving food care to 5 million children till now. Due to lack of food availability in the countries which affected by drought if children's gets proper nutrition at the first 1000 days since the born. If they didn't, they body will result in stunning which will lead to obesity or malnutrition. For example, in east Africa, the change in climate result to failure in crop growth continuously results in lack of food. More than 7 million people result the people in search of food. Childrens who are affected with malnutrition are supported by lifesaving foods through UNICEF.

This fig shows How Un support and Educate children about the rights. (

Put children's nutrition first

Above figure shows UNICEF acts to provide food for children who affected with malnutrition. (<https://www.unicef.org/media/63016/file/SOWC-2019.pdf>)

Life saving food used by UNICEF is peanut paste which helps the malnutrition children back to health in 4 to 6 weeks of course period and once the children recover it supports the family with necessary support need and educate the family with necessary knowledge to maintain the child health. UNICEF provides enough rutf for 6.85 million children and it ensure this reach all the children in the required time. (<https://www.unicef.org/supply/rutf-market-dashboard>). This can be explained by best situation of Sabina Mohammed daughter Fatuma 9 month old baby who was starving for food due to drought when UNICEF came to know about their situation they support with life supporting foods and health facility after recovering she receives medical support like iron supplementation tablets and antennal care. (<https://www.unicef.org.uk/what-we-do/life-saving-food/#:~:text=What%20do%20we%20mean%20by,to%20treat%20severely%20malnourished%20children.>).

All convention related to Children rights is based on UN convention on the rights of the Child (UNCRC). It is the broadest declaration of children right ever created and the children rights treaty with the greatest number of ratifications. The UN convention covers four main principal, and they are Non-discrimination, best interest of child, right to life survival and development and right to be heard. The UNCRC is considered more special because it addresses all aspect of a child's life. It explains how governments and adults must work to ensure all children can practice their rights. They make sure this helps all children's irrespective of race colure sex and any kind of discrimination. All UN member state accepted convention except united kingdom(<https://www.unicef.org.uk/what-we-do/un-convention-child-rights/>)

This save children by making sure all laws follow strictly to UNCRC principal, Funding and spending on children rights and development has been increased and establishing a child rights ombudsman who is independent. (<https://www.savethechildren.org.uk/what-we-do/childrens-rights/united-nations-convention-of-the-rights-of-the-child>)

The children in this generation still facing new dangers and new opportunities. The convention is not accepted or completely understood. When children are not provided with access to proper medical care, nutrition care, education, and protection from violence millions of children continue to have their rights violated. Childrens can deviate from goals easily by dropping out of school, perform dangerous jobs, get married or detained in adult prisons. Additionally, childhood now a days is transformed by change in worldwide trends such as development of digital technology, environmental change, protracted conflict, and mass migration. Children today face fresh challenge to their right but also, they have more chance to exercise their rights. (<https://www.unicef.org/child-rights-convention>)

Childrens in this decade should raise question against world leaders from government and communities to end child rights violation now for all. leaders should make sure every child has all right.
