Module Code: LCHS4001

Module: Academic and Employability Skills

Lecturer: Ramzi Djemai

Submitted on: Friday, 7th of August

Section	Response
1. Research	I chose this role because I would like to work in healthcare in the future. I enjoy caring for others, supporting people when they need help and learning new skills that can improve patients' lives. I believe that being a Registered Nurse is a rewarding career because nurses make a positive difference every day. They provide of Registered Nurse using NHS website and Google Scholar to make sure I used reliable information.
2. Presenting	I prepared my presentation by making small cue cards to help me remember the most important points. I also practised speaking several times before my presentation. Because English is not my first language, I wrote down some difficult words and practised their pronunciation. I try to pace my speech to ensure everyone understands me well.
3. Challenges you faced	The biggest challenge I faced was speaking in English because it is not my first language. Sometimes I forgot words, felt nervous or found it difficult to pronounce some medical terms correctly. I also had to make sure that I stayed within the time limit while including all the important information. Although this was challenging, I gained more confidence after practising several times.
4. Actions to improve	Before submitting my final report, I need to check all my information again, find more academic sources, and make sure that my references are correct. I will also proofread my work carefully and correct. I will also proofread my work carefully and correct any grammar or spelling mistakes.
5. Further steps needed to Prepare for Task 3	For task 3, I will continue researching using academic sources, improve my academic writing skills, and use Harvard referencing correctly. I will manage my time better, organize my work carefully, and submit a well-organised, accurate, and high-quality report.
