

NAME: Harsin Ahmed

STUDENT NUMBER: 2028452

**MODULE CODE AND TITLE: BMSW4003 Research
Proposal**

**ASSIGNMENT TITLE: How do Students use
technology to collaborate at UWTSD?**

Table of Contents

I	Introduction
II	Relevant existing research
III	Ethical Considerations
IV	Methodology
V	Hypotheses Development
VI	Reference List

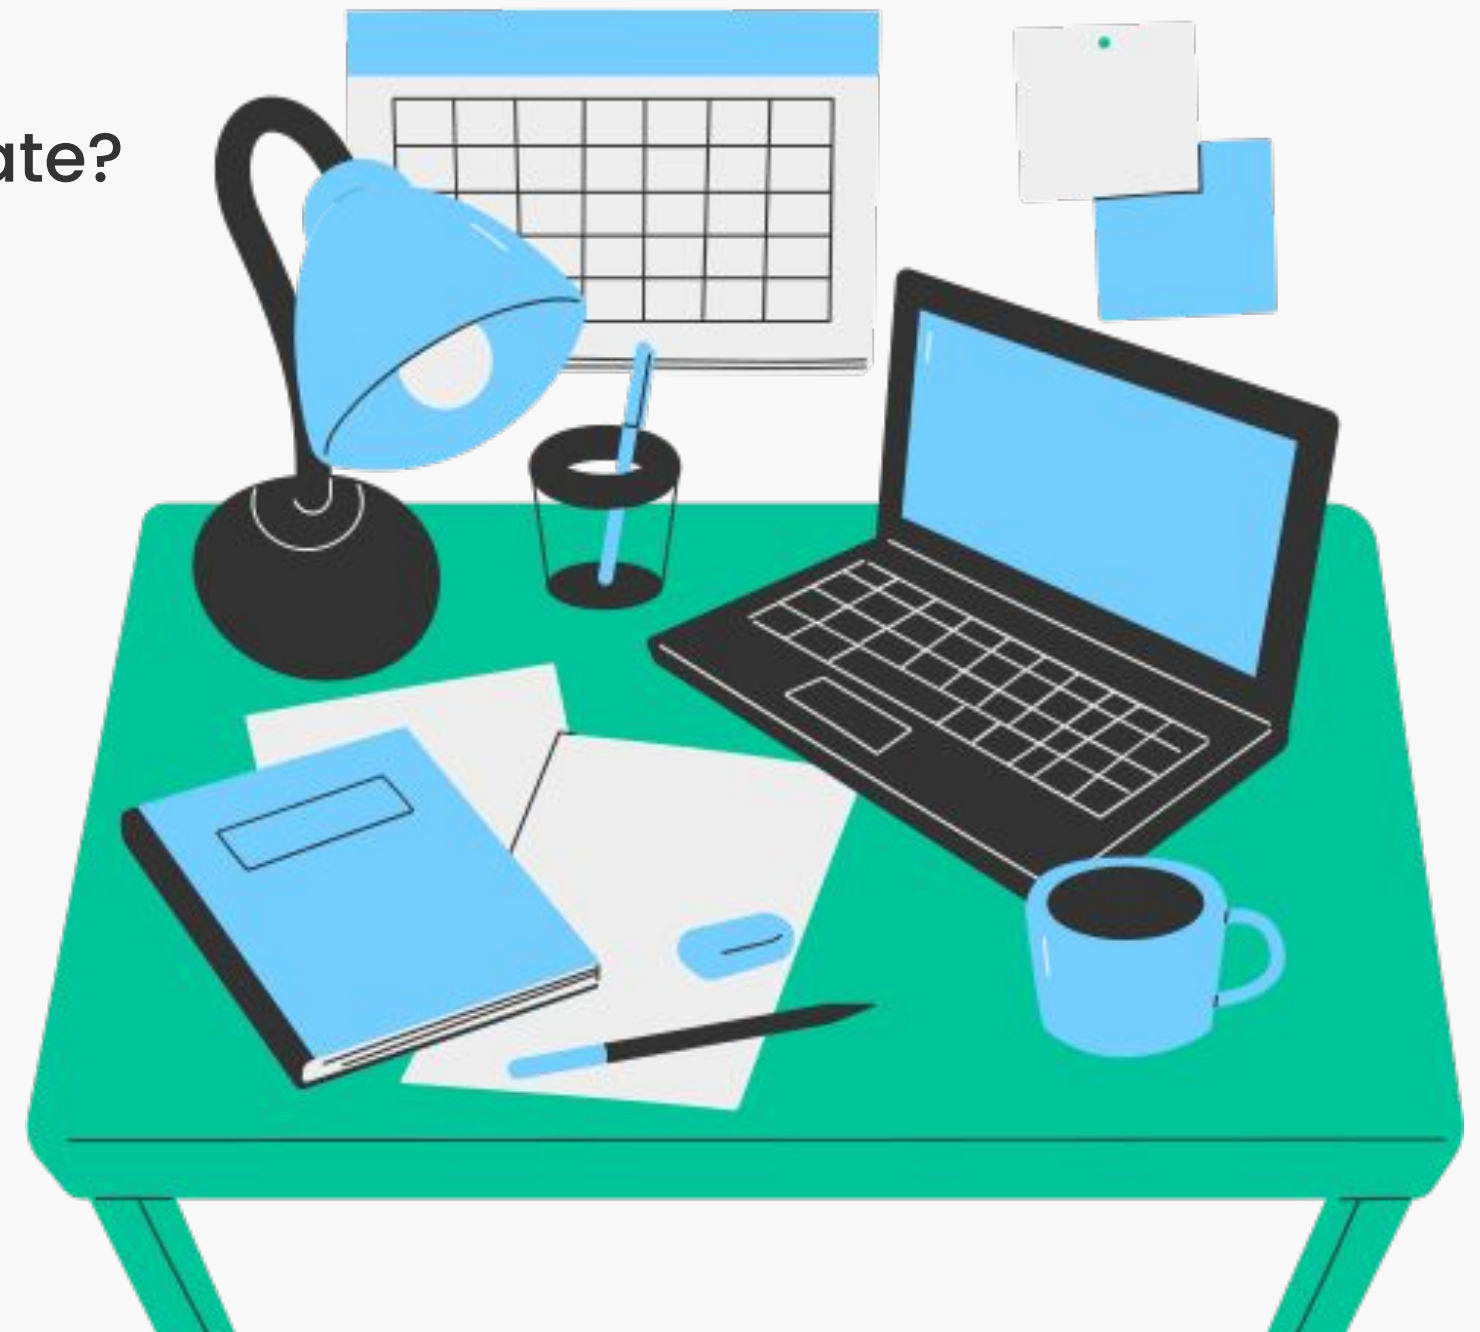

INTRODUCTION

- **GOALS OF RESEARCH**

How students use technology to collaborate with the University of Wales Trinity Saint David (UWTSD).

- **CHOSEN RESEARCH QUESTION**

Are students confident in using technology to collaborate? Frameworks in higher education have rapidly evolved over the last seven years as they have been developed, implemented, assessed, and improved. The rapidity with which this transition is taking place reflects both the rapid advancement of technology-related terminology and our growing awareness of the situations in which people acquire and apply digital abilities (Haan, 2017). The development of digital literacies is becoming increasingly dependent on increasing student understanding of this context and encouraging reflection on it.

RELEVANT EXISTING RESEARCH

Addressing the digital skills gap for future

education

Author

- Joshua A. Jackman,
- Douglas A. Gentile,
- Nam-Joon Cho &
- Yuhyun Park

Published: 11 March 2021

""We must work harder to provide pupils with the fundamental digital skills they need in order for them to succeed online (Joshua A. Jackman, 2021).""

ETHICAL CONSIDERATIONS

The moral measures that will be utilized for this questionnaire will be:

- Full participant assent,
- A suitable degree of confidentiality
- Anonymity
- Moreover, it will be mentioned on the questionnaire that the data will be kept confidential and will only be used for research purposes .

These criteria were based on those defined by Business Research Methodology as ethical

interviews (Plummer, 2000)

Methodology

Method

Survey

Expected Collected

Sample

20 completed survey

Location/ Who will
we ask?

UWTSD Students

Duration

2 weeks

WHAT QUESTIONS WILL WE ASK ?

- Gender
- Age
- I feel confident while using MS 365
- I feel confident while using Moodle
- Technologies like MS 365 and MOODLE help to increase my productivity
- Technologies like MS 365 and MOODLE act as a great resource for students
- And the main question, “Are students confident in using technology to collaborate?”

How we will ask ?

SOURCE

- "Google form"

MEDIA

- email
- Whatsapp

The data was saved in an Excel document and examined using table and graphs (Jailobaev, 2021).

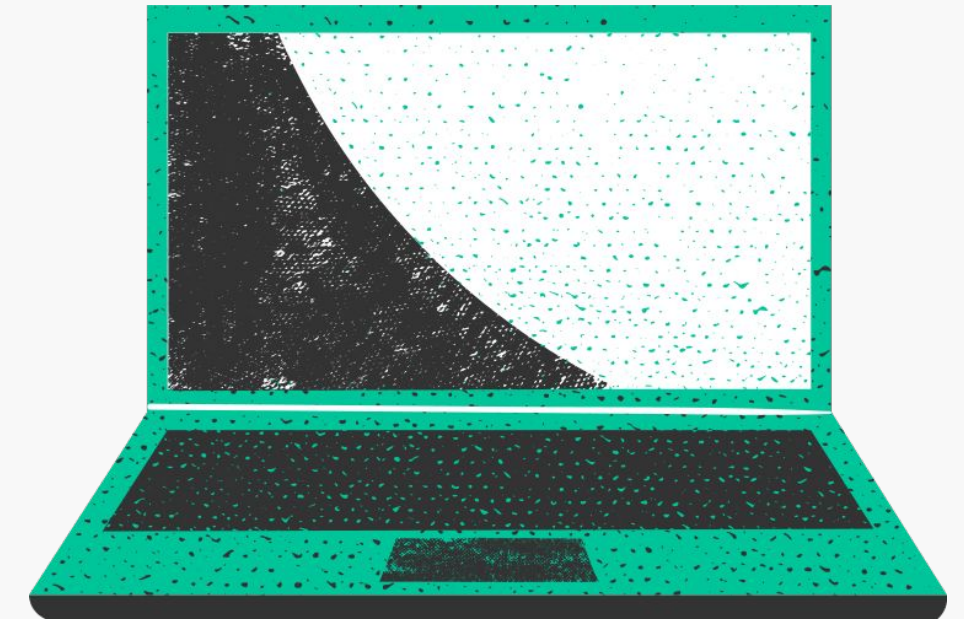

HYPOTHESIS DEVELOPMENT

HYPOTHESIS

Students are confident in using technology to collaborate at UWTSD

The report will clearly show us the growing importance of digital skills across all industries, and workers who lack these skills will need to learn and adapt if they want to keep their jobs. As a result of the widespread use of technology, digital skills are the cornerstone of the workforce of the future and will soon be necessary for any company's survival.
