Knowledge and Understanding Skills	15
Feedback	Mark
To score high marks in this section you need to address, team formation, selection process for the scrum leader and other relevant roles, provide details about the GIT repository, and reflect on individual knowledge and understanding of the project. Introduction and Team formation not documented. Team Roles not allocated appropriately. Seems like the coordination was not proper within the team and the work was done in the last minute. GIT Repo link shared and accessible. However, the GitHub repo only had a py file. Without describing Team roles, it is very important to add more detailed description on your individual contribution reflecting the knowledge and understanding gained, which was missing.	7.7

Cognitive and Intellectual Skills	15
Feedback	Mark
To score high marks in this section, justify your project selection with clear objectives, provide evidence of project planning, cover future enhancement plans, and include individual reflections on troubleshooting skills and active involvement in finding solutions to problems. Justification to select option 2 could have been elaborated. Objective not set appropriately. Project planning was not done adequately. Could have started with a description of what is asana and trello are used for. The deliverables of this work needs more clarity. Very randomly stated about issues. However, the reflection on troubleshooting skills and finding solutions was not documented with strong arguments. Issues with Mac? Why don't you use PC's in the lab to complete the work?	5.6

Practical Application Skills	45
Feedback	Mark
To score high marks in this section, include evidence of design, source code, access to GitHub, implementation details, testing methods, successful execution of the application, and provide individual reflections on version control systems, supported by screenshots as evidence. Source code shown. What was the outcome? Could have implemented best coding practices. (Comments/Description within the code etc). Was the code tested? What testing methods was used? Lack of assigning appropriate roles to the team is reflected in all aspects of the work. The work needs a lot of improvement.	20.6

Transferable Skills for Life and Professional Practice	25
Feedback	Mark
To score high marks in this section, demonstrate a creative approach, showcase effective teamwork, provide evidence of collaborative problem evaluation, include individual reflections on lessons learned from working as a group, and ensure that the report is complete, of high quality, well-presented, and organized with a logical flow of ideas. Teamwork documented. However, its seems to have communication issues. Not all the team members	

work match to others. One documents the team roles, ice breaker questions but others don't. Lack of communication. Could have improved the collaborative approach in evaluating the problem. More focus on Implementation and research, Testing, version control etc required. What did you learn from this group project? Very generic reflection. At Level 5, your academic writing quality is not at par. Need to improve your academic writing skills	10.9
Overall Mark	45
