1. Research-informed Literature				
Introduction	/5	/5	/5	4 /5
Literature Review	/20	/35	/20	5 /15

Comments:

Good intro to the topic under consideration. Unfortunately the literature review is sparse but light on research. Student has failed to include specific aspects relevant/ needed to undertake this project. This section only succeeds in scratching at the surface of what is an interesting field of research.

2. Knowledge and Understanding of Subject				
Methodology	/5	/5	/5	2.0 /5
Survey Design	/15	-	-	-
Requirements/Design	-	-	-	2.0 /5

Comments:

Partly written / considered sections to the document. The design or development section resulted in a more reflective description of what happened - rather than a detailed plan of attack.

Results & Discussions	/25	/25	/25	10 - /25
Conclusions and Recommendations	/10	/10	/10	4.5 /10

Comments:

limited set of results achieved - due in part to poor time management and problems encountered with using unity games engine. From the feedback gained, fairly appropriate conclusions appear to have been drawn. Future work outlined to address some of these issues.

4. Practical Application and Deployment				
Development	-	-	-	8 /15
Experimental Design	-	-	/15	-

Comments:

A fairly basic piece of software has been developed that integrates with Unity Games Engine. Student has successfully developed a test harness to test hypothesis. Limited results gained - mainly due to time limits & number of people able/willing to test the program.
fairly well written code throughout.

Reflection	/10	/10	/10	6 /10
Quality of Report	/10	/10	/10	~~4~~ /10
Comments: No section on reflection. However, several parts of the document exhibit good levels of reflection & critical analysis. The quality of the report is o.k. Many sections are light on content, and generally feels poor. However all necessary sections have been addressed & supported with adequate references where required.
