7. What you feel is working well *

i didnt get any feedback for this. It was mostly that the course is fine and that nothing great is standing out.

8. What could be improved / Dislikes *

Some have said that deadlines have been very early this semester. There was a reading week and most of the material hadnt been taught or only exam material was taught. How can we use the reading week to its full potential without being taught fully on a topic/assignment. Another bit of feedback was from a cyber student and they said that they thought that the courses they have to complete are excess for a semester and that they should be spread out more. Last bit of feedback was that some student wished that the reading weeks aligned with the school holidays.

9. Any suggestions or ideas to improve *

I would suggest setting dates that are after all work has been taught and at least give us 2 weeks from then to complete the assignment.

11. What you feel is working well *

Moodle has everything we need, material wise

12. What could be improved / Dislikes *

Maybe record lectures for people that cant make it for genuine reasons

13. Any suggestions or ideas to improve *

Record lectures

15. What you feel is working well *

Contacting a lecturer is relevantly easy and they do answer quite swiftly

16. What could be improved / Dislikes *

Just be more understand that some of the information beign taught to us is so heavy. More breaks to help people stay focused. Instead of calling out people that look tired and bored try and engage with them in a better way.

17. Any suggestions or ideas to improve *

Have a break between the 2 hour lectures even if its 5 minutes
