21st June, 2026,
The Relevant Manager,
Equans (GROUPE BOUYGUES),

Dear Sir/ Madam,

I am currently working at Genting Casino, China town, Birmingham. I am currently a senior Croupier. I have a good work ethics and a positive mind set to push forward for success. I am very interested in your vacant position of IT Project Manager. I have been working towards a career as a compact and well equipped (rounded) Project manager in recent times and this role would help to give me the experience I need to progress to that ambition.

I have been very strong in areas of customer service, charisma and overall customer communication. I have done several courses that have helped me to adapt to the business environment and this country since migrating to the United Kingdom in 2016. I have also kept one job from 2017 and progressed in that company. I have been an undocumented Apprentice with Scott and Scott Construction limited for over 15 years learning the relevant skills of budgeting, project management, marketing, construction management and property development.

My interests are watching football, cricket and Most aspects of the music business as I am a music producer as well. I also enjoy history and watching documentaries. I have also done undocumented work in politics, and sports when I resided in Jamaica. I am currently pursuing courses and joining professional bodies that will enable me to be a marketable and desirable Project manager.

I really feel that this job opportunity is the next step for me and can give me the opportunity to prove my self as an asset to your organization and the United Kingdom. I will try my best to complete tasks to the best of my ability and serve your company with passion, pride, humility and dignity. I hope you find me suitable for this role and I'm looking forward to hearing from your company.

Thank you,
Janeal Langrin.
