Hi hope all is well and thank you for attending our PowerPoint presentation. Today we will be discussing a topic that widely affects students including ourselves as we are students. Today we answer the question which digital tool is used most by students at UWTSD to collaborate?

What are digital tools and collaboration ??

Digital tools are programs, websites or online resources that can make tasks easier to complete. A lot of these can be accessed in web browsers without needing to be downloaded, and you can access them both at home and in work which is very useful.

Digital tools for example can be Microsoft teams, Google classroom, 365 Office, Dropbox, One Drive, Moodle and many more . Digital tools have shown to be affective on students learning at UWTSD and other students worldwide.

Collaboration means a collaboration is a piece of work that has been produced as the result of people or groups working together. To have 'a successful and affective collaboration it requires commitment.'

What is Digital collaboration??

Digital collaboration is using digital technologies for collaboration. Dramatically different from traditional collaboration, it connects a broader network of participants who can accomplish much more than they would on their own. It creates 'meaningful interaction to help stimulate classroom discussions online and creates a community of learners. Peer to peer interaction can inspire a positive learning atmosphere which can help students feel confident,' from article EU Business school.

Which digital tool is used most by students at UWTSD?

Digital Learning and Teaching (uwtsd.ac.uk)

UWTSD is very proactive in digital learning tools and has included it in the framework. We have already had various teaching methods such as face to face sessions, pre-recorded sessions, online activities, group discussions and interactive tutorials. These digital tools are used by students, lecturers, researchers and professional services staff. The main ones at UWTSD that are used are Moodle, virtual classes (Zoom), Teams, Outlook, One Drive, Office 365.

OUR OPINION

Aliyah opinion- I do believe digital learning and collaboration has helped me think more openly in discussions with peers. Digital learning isn't something I would of believed was important until it was a part of my assignment but I am glad I have and would love to continue to learn more about digital tools and collaboration. Collaborating has been very helpful as it releases the stress and you get to know the person your working with and I want to say thank you to my partner Ifrah for being proactive and helpful. Thank you

Ifrah's opinion- collaboration is very important for the students because they are working together and helping each other. Working in groups made it easier to achieve our goals. thanks Aliyah for your cooperation and I am very glad to be your partner.

Goodbye.
{for now}
