Module Name: Group Project

Assignment Title: Project Proposal

Project Topic: Smart cities: the role of technology in urban development

Student Name:

Dan Dumitru

Marius Oancea

Mihai Peleski

Mihai Gabriel Radu

Student ID: 2323370

Table of Contents

• Introduction.....	3
• Reasons behind choosing the project.....	4
• Benefits of choosing the project.....	5
• Conclusion	6
• References	7

Introduction

- Technology has a greater impact on the urbanisation of the cities from different destinations all over the world.
- This is a great initiative that should be taken for the better development of society and to upgrade the inhabitants as the changing times.
- Moreover, this topic will include the challenges and the benefits of implementing technological advancements within the urban areas to make those into smart cities.

(Robinson, 2023)

Reasons behind choosing the project

- As the world is evolving with the time, the urban areas need to be developed as per the changes in the society.
- This will improve the lifestyle of the people from different destinations.
- Apart from that, this will mitigate the issues faced by the individuals due to the lack of betterment in the old cities.

(Bibri, 2020)

Benefits of choosing the project

(Robinson, 2023)

- This project will highlight the strategies for the implementation of technology to advance the urban areas.
- Moreover, it will elevate the lifecycle of the individuals of the different destinations [3].
- Apart from that, it will also guide the inhabitants in saving energy by incorporating advanced and sustainable technologies within the infrastructures.

Conclusion

- This proposal has highlighted the importance of IoT technologies in the urbanisation.
- Apart from that, it has demonstrated the reasons behind choosing this project along with the benefits of undertaking this topic.
- This has demonstrated the ways in which cities can be developed and the profits from the execution of these strategies.

(Bibri, 2020)
