Breadth of research (20%)	All references are journal/white papers or books	Most references are journal/white papers or books	Some references are journal/white papers or books	Only references websites	No references
Description of findings (20%)	Full and detailed description of the topic	Describes a wide range of features relating to the topic in depth	Describes a wide range of features in overview or a small number in depth	Describes the main features of the topic	Incorrect, misleading or missing.
Identification of key issues (20%)	Considers both historical context and future development of issues	Considers either historical context or future development of issues	Covers a wide range of issues in overview or a small number in depth	Identifies the most obvious issues	Incorrect, misleading or missing
Analysis of key issues (20%)	Discusses how likely future changes will affect these issues	Identifies major themes across multiple issues; strong analytical discussion	Compares and contrasts a wide range of issues in overview or a small number in depth	Discusses the most obvious issues	Incorrect, misleading or missing

Non-submission for a section will result in a mark of 0 for that section.

Try to use fewer quotations - it's better to have your words wherever possible. When using figures remember to label them and refer to and explain them in the main text. You shouldn't just expect the figure to do the explaining for you. Be careful of your word count in future. Good overview of the topic, but remember to split into sections.
