

Cognitive Seminar: Long-term memory

Henke's Processing-based model (2010) of LTM vs. traditional system-based accounts.

- With the use of information from Chapter 7 of the Eysenck and Keane Cognitive Psychology textbook, discuss the following:
 1. In the space below, provide details of Henke's Processing based account of LTM.
 - You must provide references and examples of empirical research studies.

2. In the space below, provide details of the traditional systems based account of LTM.
 - You must provide references and examples of empirical research studies.

3. In the space below discuss the distinctions/differences between the two accounts and provide examples of research evidence to support your arguments.

4. Discuss any criticisms of the accounts with backing from appropriate references.

- Criticisms of Henke's processing account:

- Criticisms of traditional systems account:
