Hiring Manager

Cobham Electrical Contractors

Dear Hiring Manager,

I am writing to express my interest in the Self-Employed Electrician position at Cobham Electrical Contractors.

I recently completed my Level 1 and Level 2 qualifications in Electrical Installation at Newham College London and I am keen to begin my career within the electrical industry. Your company stands out to me because of its reputation for quality workmanship and its involvement in the rapidly growing electric vehicle charging sector.

During my studies I gained knowledge of domestic electrical installations, wiring regulations, health and safety procedures, and electrical testing principles. I have developed strong practical skills through my college training and understand the importance of working safely, accurately, and professionally.

Alongside my studies, I worked as an Amazon Delivery Driver where I developed excellent customer service, communication, and time management skills. Working independently every day taught me the importance of reliability, organisation, and representing a company professionally when dealing with customers.

I am a hardworking, motivated, and quick learner who is eager to continue developing my electrical skills. I enjoy practical work, take pride in producing high-quality results, and am always willing to learn from experienced electricians. I believe I would be a positive addition to your team and would welcome the opportunity to contribute to your growing business.

Thank you for taking the time to consider my application. I would appreciate the opportunity to discuss how my enthusiasm, qualifications, and willingness to learn can benefit Cobham Electrical Contractors. I look forward to hearing from you.

Yours faithfully,

Catalin Andrei Dinu

Job description

About the Role

We are looking for a reliable and experienced self-employed electrician to join our growing team at Cobham Electrical Contractors. The role will primarily involve the installation, testing, and commissioning of domestic EV (Electric Vehicle) charging points at customers' homes.

This is an excellent opportunity for an electrician seeking consistent work with a company operating in one of the UK's fastest-growing sectors.

Key Responsibilities

Install EV charging points at domestic properties.

Carry out electrical testing, inspection, and commissioning.

Complete all installation paperwork and certification accurately.

Ensure all work complies with the latest BS 7671 Wiring Regulations.

Maintain a high standard of workmanship and customer service.

Communicate professionally with customers and the office team.

Work independently while representing the company in a professional manner.

Essential Requirements

Qualified Electrician (NVQ Level 3 or equivalent).

Inspection & Testing qualification (City & Guilds 2391 or equivalent preferred).

Valid ECS or CSCS card.

Full UK driving licence.

Own van, tools, and testing equipment.

Public Liability Insurance.

Strong attention to detail and commitment to quality workmanship.

Desirable Skills & Experience

Previous experience installing EV chargers, including brands such as Hypervolt, Ohme, Zappi, Andersen, Easee, Wallbox, and Pod Point.

Experience working on domestic electrical installations.

Ability to work efficiently, troubleshoot issues, and solve problems on-site.

What We Offer

Regular work.

Prompt and reliable payment.

Flexible workload.

Opportunity to grow with a rapidly expanding business.

Friendly, supportive, and professional team environment.

Apply Now

If you're a professional and dependable electrician looking for ongoing EV installation work, we'd love to hear from you!

If you would like to apply, please send any resumes to: cobhamelectricalcontractors@outlook.com.

Pay: £200.00-£250.00 per day

Work Location: On the road
