

How to create a chart in excel

Charts are a great way to visualize and analyze your data, and Excel offers a variety of different chart types. You have line charts, pie charts, pivot charts, and many more(Stratvert,2024)

First important step: Before creating a chat you should first have data organised in the form of table.

Example of data

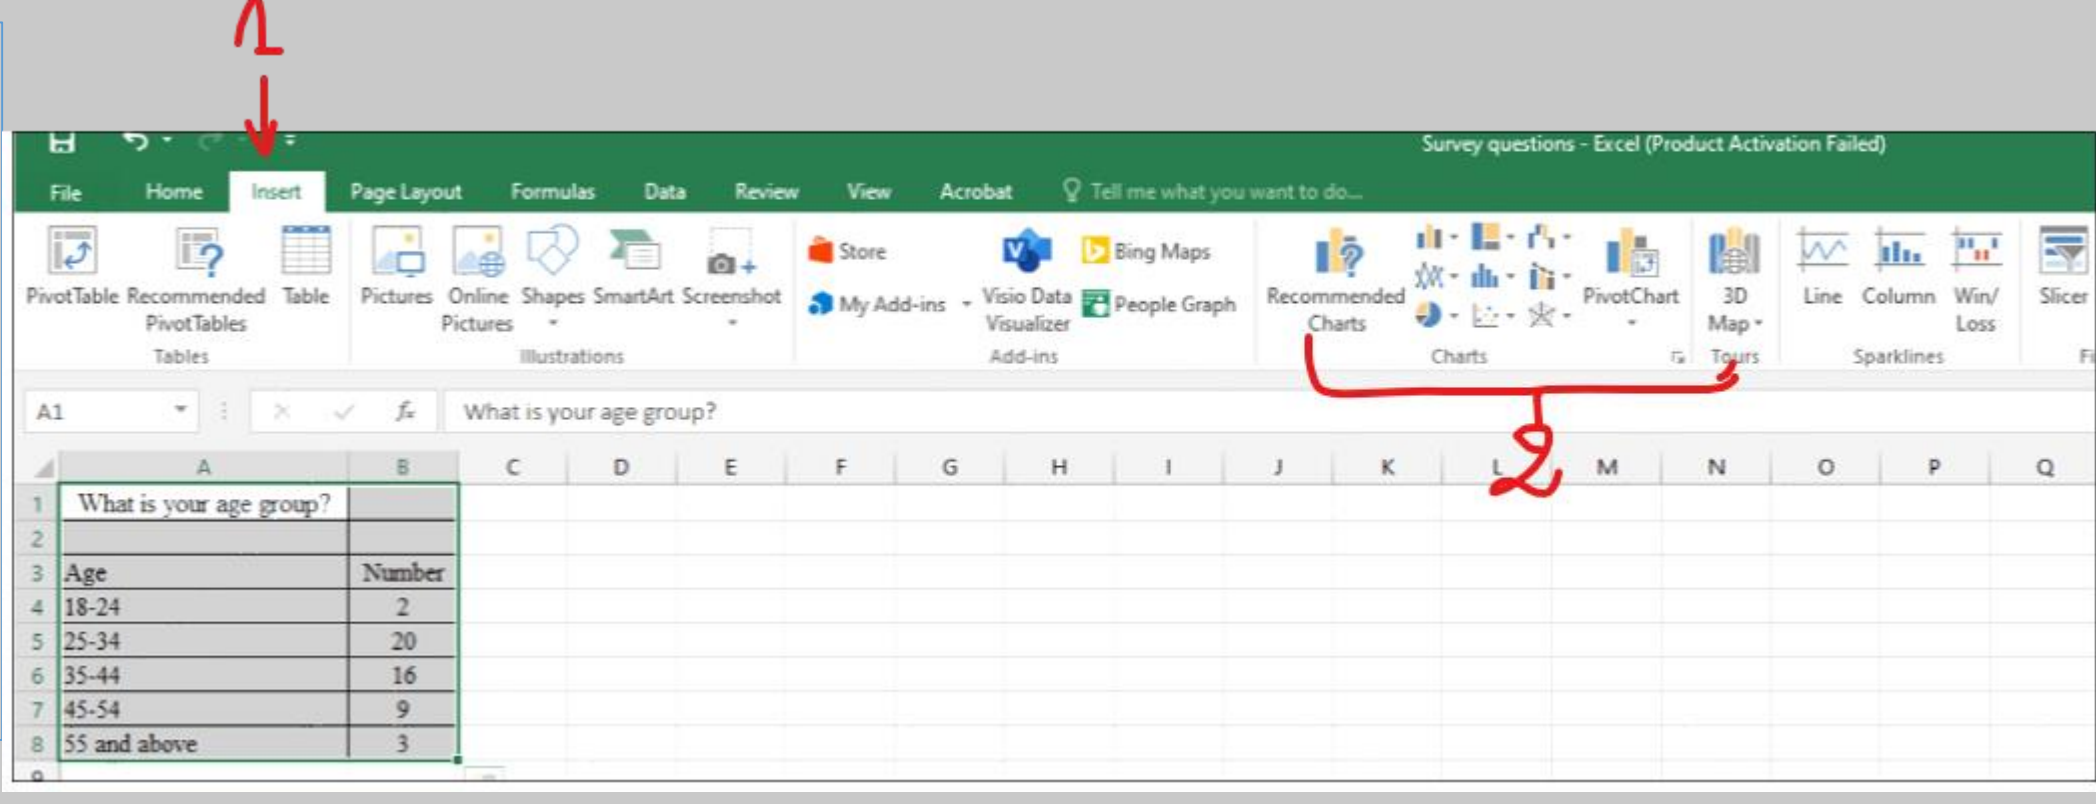

What is your age group?	
Age	Number
18-24	2
25-34	20
35-44	16
45-54	9
55 and above	3

Here how to create a chat, following these steps:

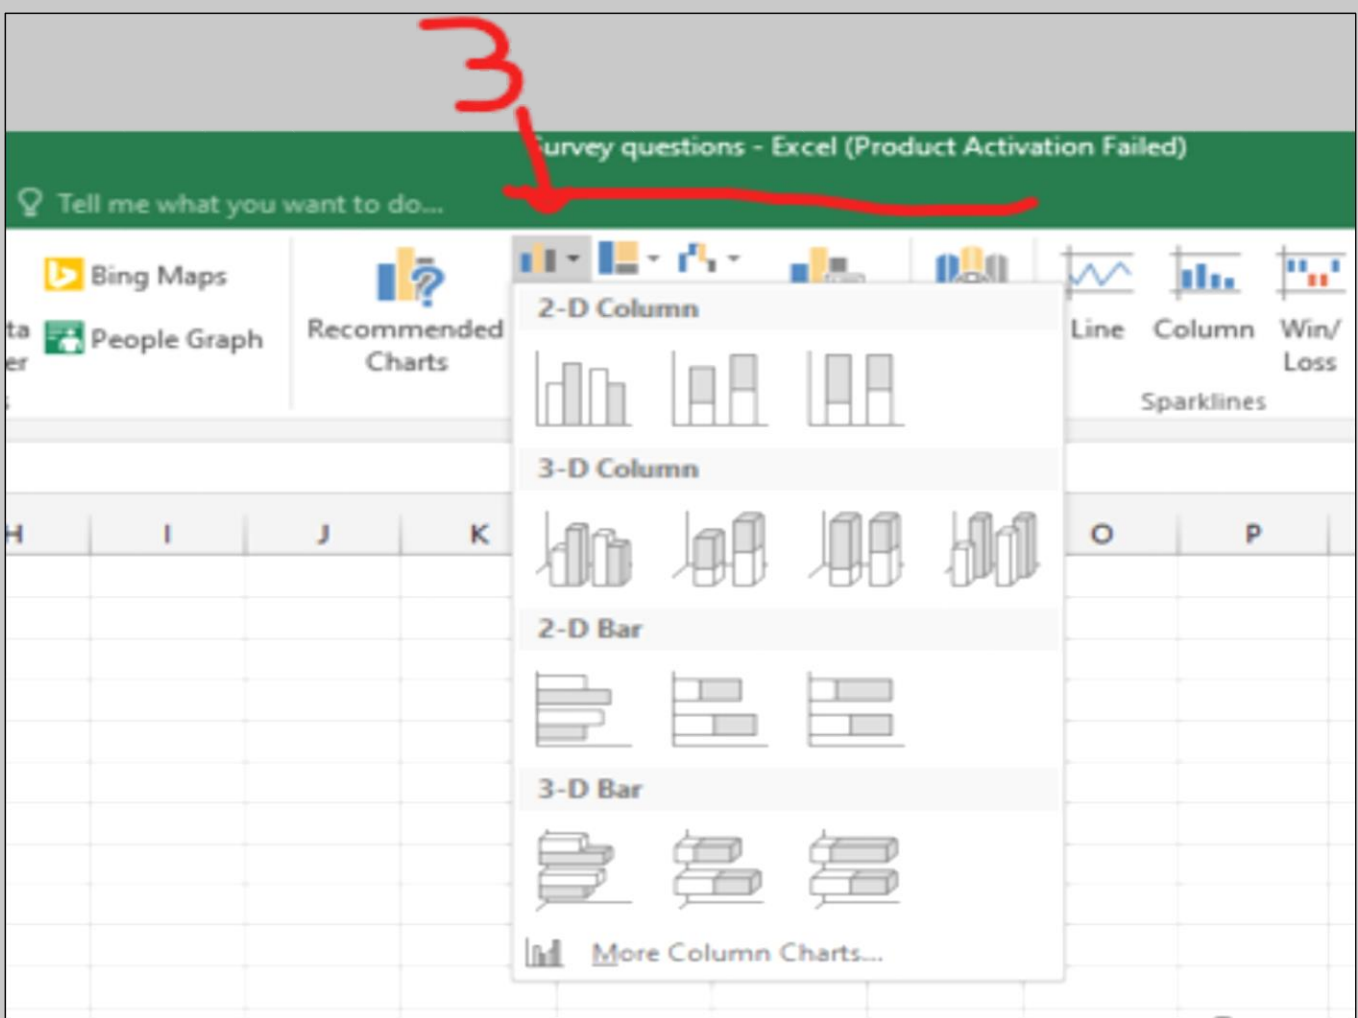

1st Step: You have Microsoft Excel, launch the app and filled out as below:

What is your age group?	
Age	Number
18-24	2
25-34	20
35-44	16
45-54	9
55 and above	3

2nd Step: Highlight the data in 1st Step and click INSERT as point 1, following 2.

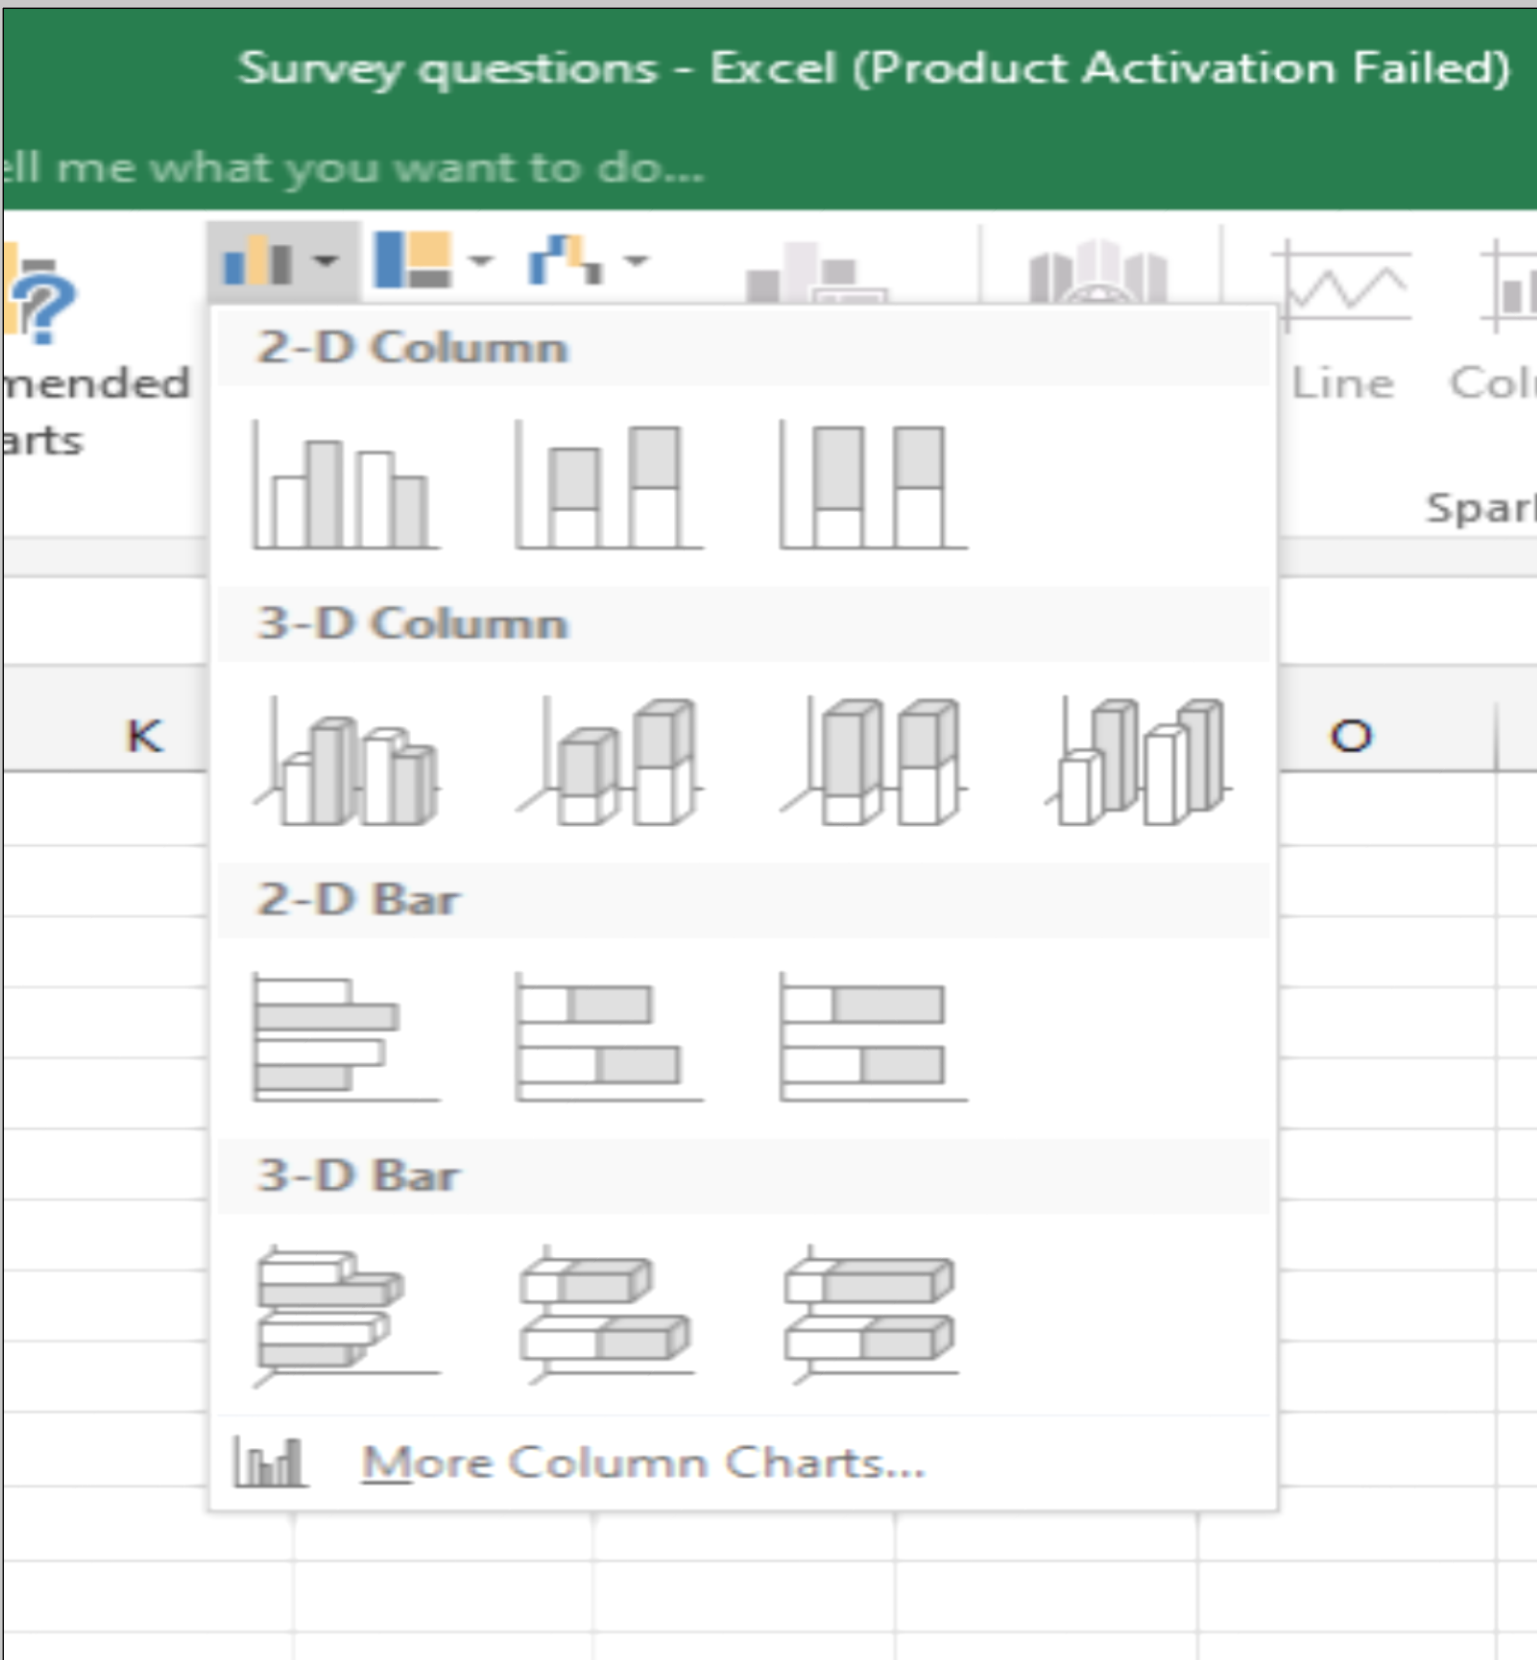

After click as shown in point 2, Various of chat, graph will be displayed and choose whatever you like

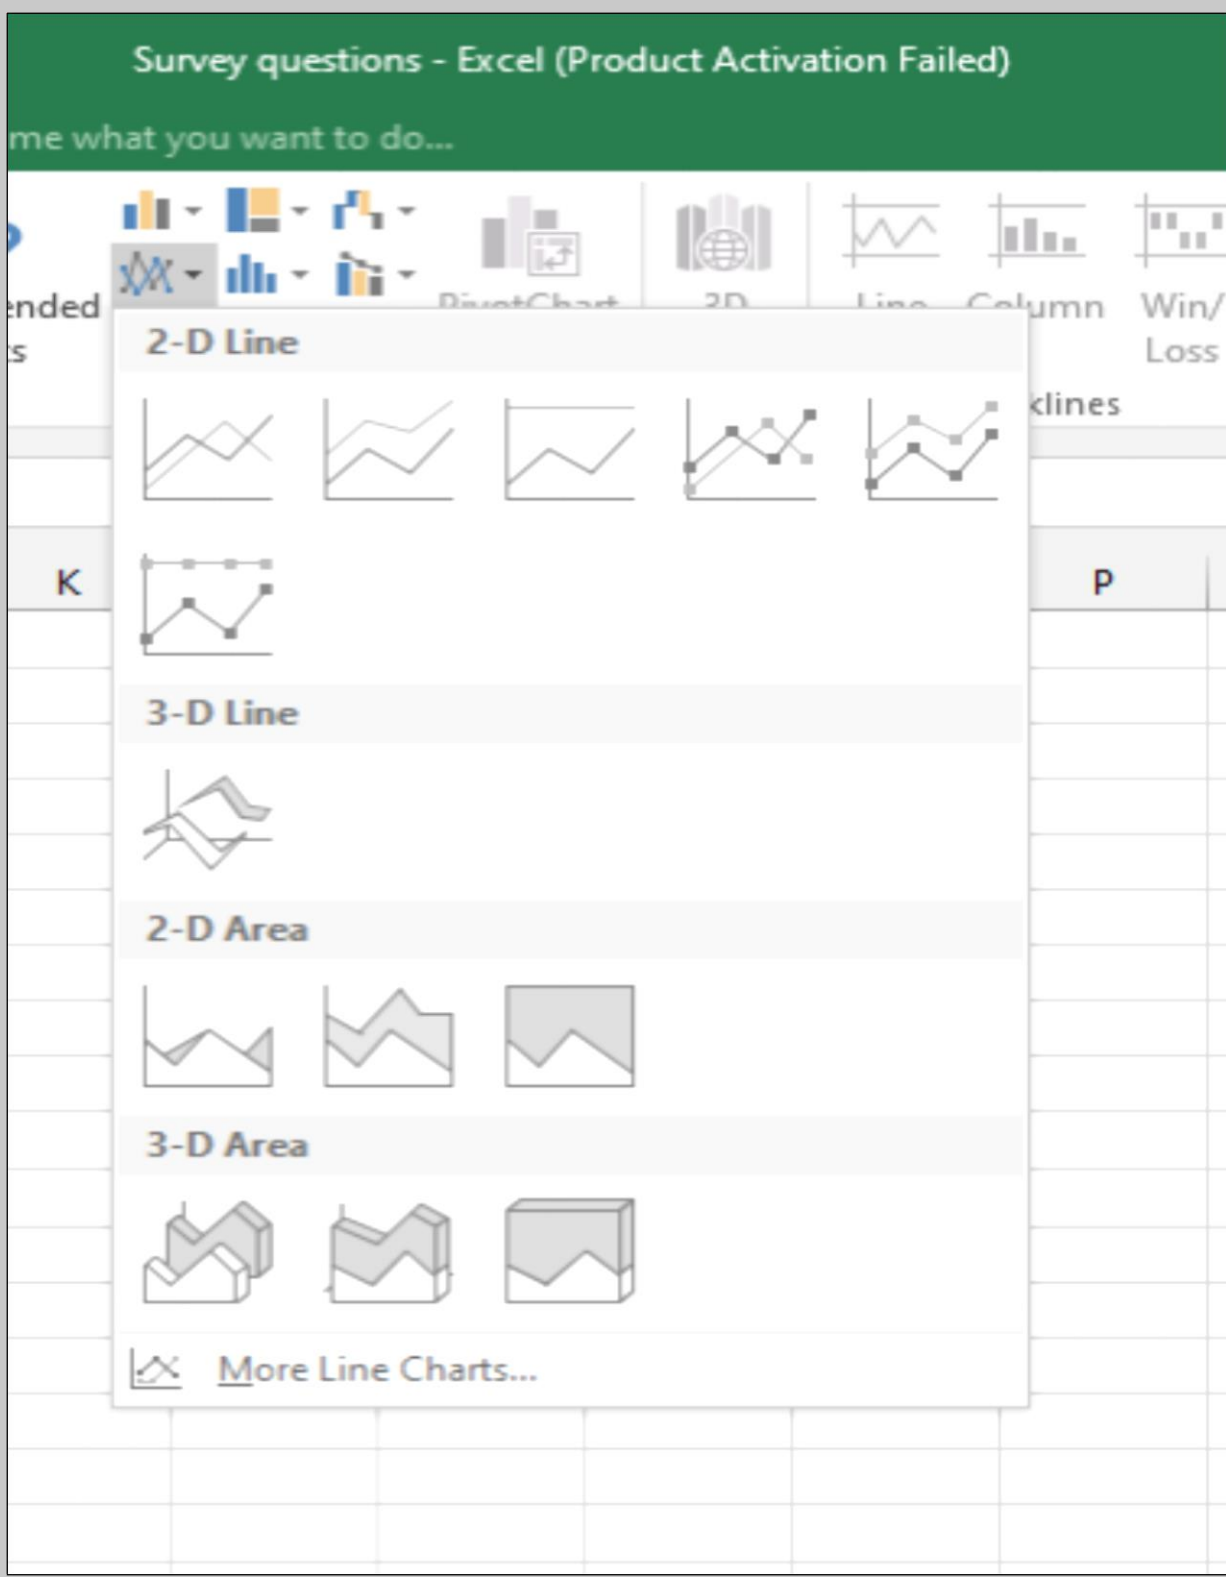

Remember the excel has various of charts such as: line charts, pie charts, pivot charts, and many more.

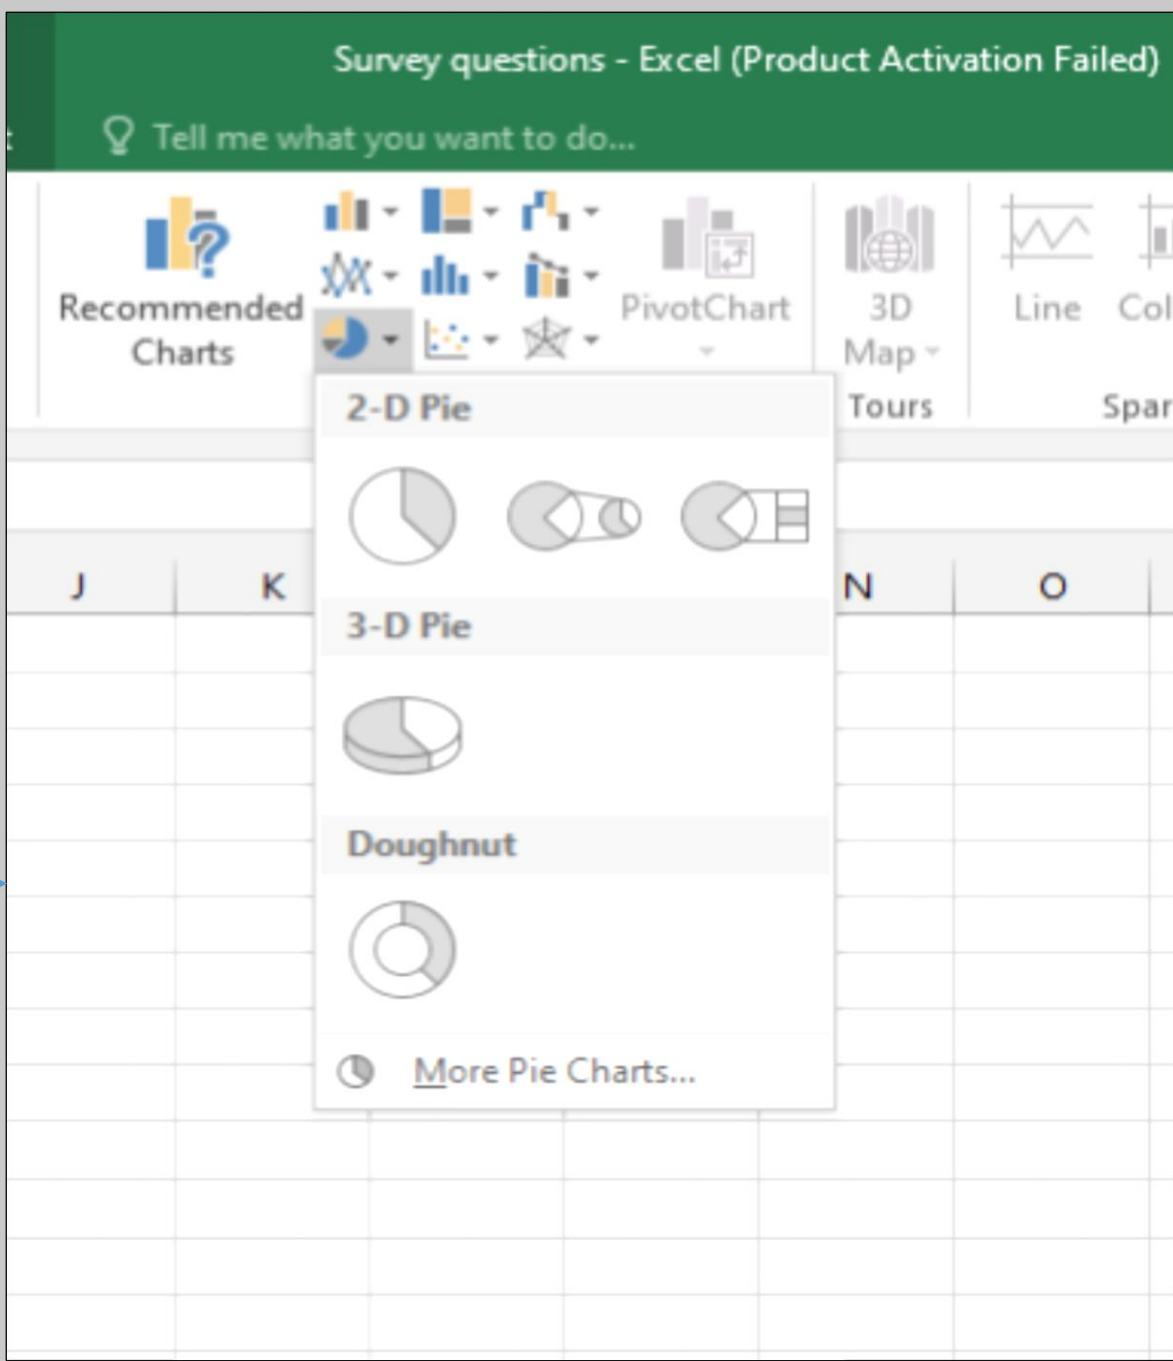

Types of Charts you may choose from number 3:

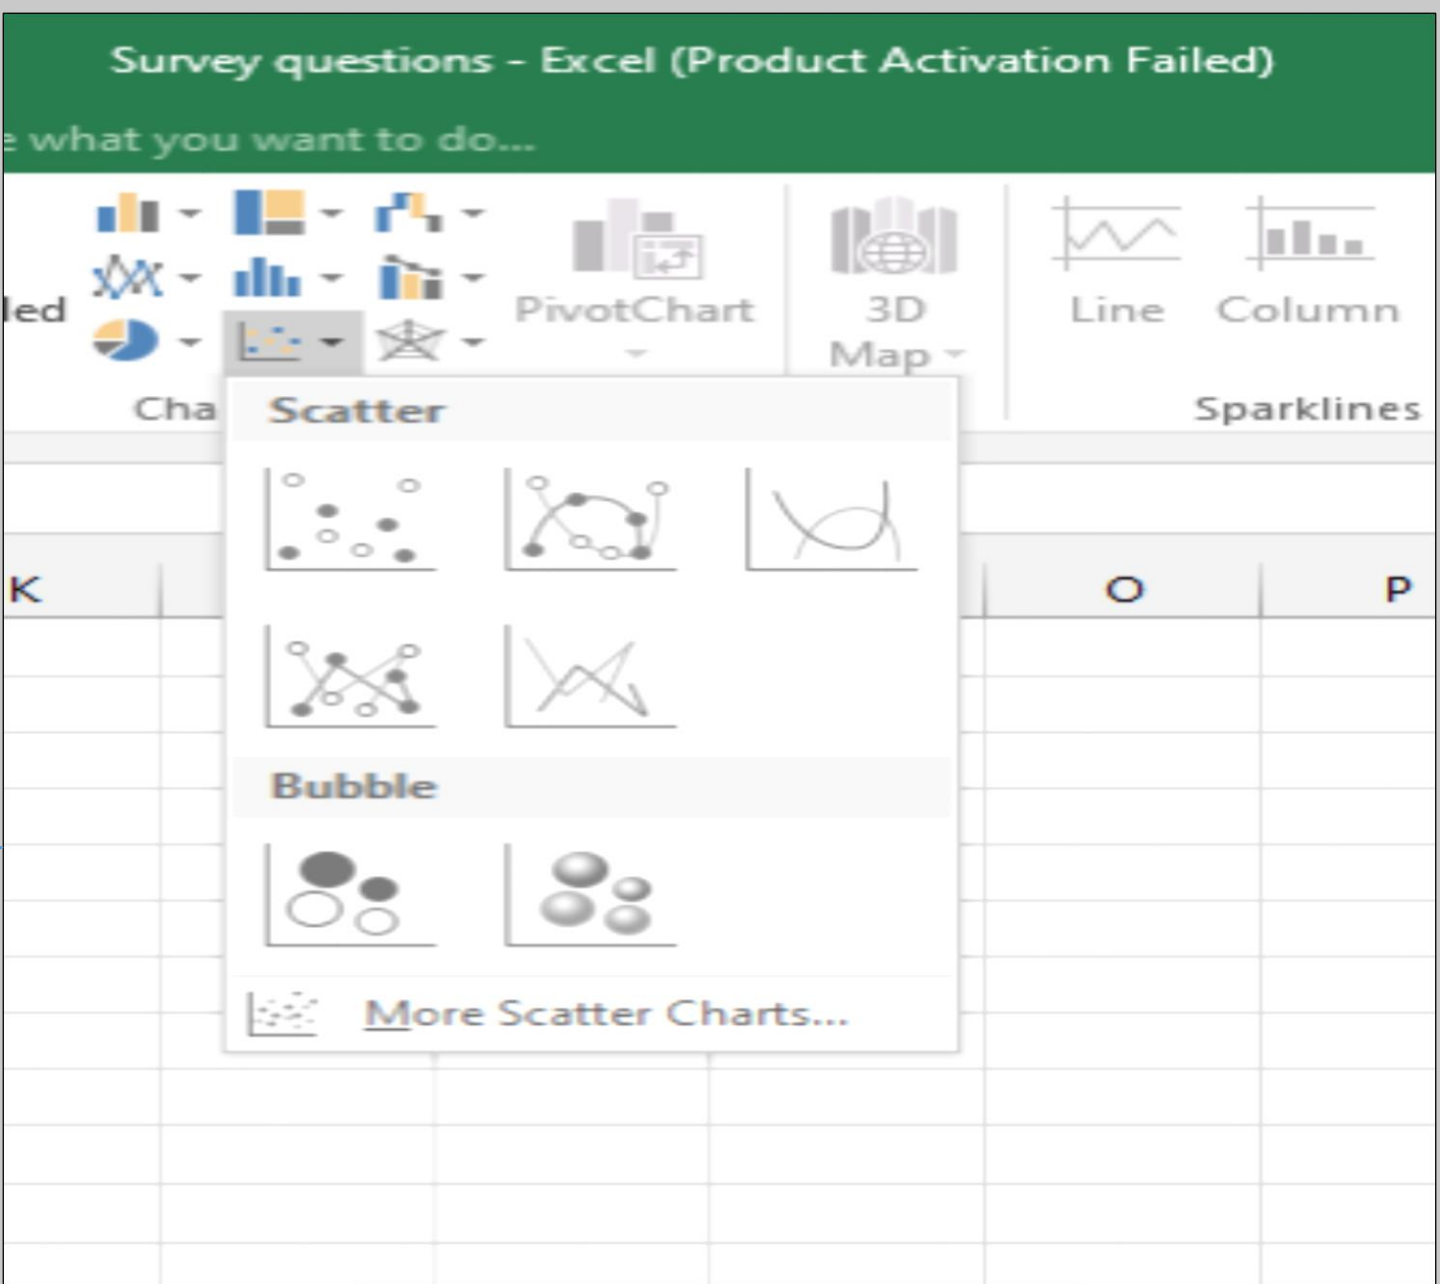

Column chart

Line chart

Pie and Doughnut charts ·

Area chart · XY (scatter) and bubble chart

In summary :To insert a chart, highlight all of the data that you would like to analyze. I'll select the headers, the month, and cookie sales, and then highlight all of this data down below.
