What I would like to get into/ my career choice?

I would love to get into charity work and hopefully have my own charity.

Its something that I've always wanted to do and I would love to make a change to the world we live in today.

“Working for a charity can be a great opportunity for you to develop, not only in your chosen career path but also in other areas.”

I love helping people.

My dad has a charity back home so i want to follow his footsteps

## My strengths

I have worked with a few charities before so I have experience.

Time management is one of my strengths and important for workplaces. “It will make you a more efficient worker and you will be able to meet deadlines with ease. You can also produce quality work” (Wade, 2020).

Organization skills is key in workplaces because it helps you structure your time and tasks.

“Much of a charity's work can be measured by it's ability to spread an effective message. Regardless of what role you apply to, you'll need to communicate with people both within a charity and externally and so you'll need to make sure your communications are top notch” (Bright network).

## Weakness

Problem solving can be a difficult at work. This could be because of some events could take place and making quick choices can be hard.

Reflective writing is another weakness I have. A lot of workplaces including the career choice that I have picked require you to speak about experiences or write essays. To work your way up as getting a higher position it is important to have this skill

How am I going to improve on my weaknesses?

Apply it to my everyday life and what I do

## Opportunities

One opportunity that I could gain working at a charity would be meeting new people.

“Social interaction is a big part of a charity role, and there can even be opportunities for international postings and the chance to travel, opening doors that lead to all kinds of inspiring and rewarding work” (Job seekers, 2009)

Another opportunity that I would have is being able to expand my charity all over the world.

## Threats

Some threats that charities face are the public trusts.” Most charity leaders think that the sector has been badly impacted by negative media coverage, and that people do not

understand the importance of charities.” (CAF Charity Landscape,2019)

Another obstacle that charities face are that they don't use technology a lot to engage with people about what they are doing. This can be hard for people to find out about the charity.

There are a lot of charities out there and competition. This is a threat because it can be very hard to get noticed.

## Personal development plan

Knowing I have experience working with charities its easier for me to know what I am getting into and what it takes to work in one.

My next step now is to hopefully volunteer work abroad once lockdown is over.

Taking this step can later on help me make my own charity in Africa.

I've also done a lot of research into the social media side of it and this has helped me know how I would put my charity out there for people to engage with.
