

Digital safety

Digital security is an organisation that creates protection for all people who have the internet. In other words, cyber security. Help eliminate the risk of viruses and online attacks. Maintain personal security.

Digital security is a set of measures aimed at protecting the confidentiality, integrity and availability of information from virus attacks and unauthorized interference.

It is good practice to regularly perform security audits and improve personal computer skills.

5 cyber safety tips?

- **Don't post information about yourself online**
- **Keep passwords protected.**
- **Don't forget about people hiding their identity to deceive and gain your trust.**
- **Avoid online discussions with foreign people.**
- **It is a risk to meet up with people you've met in online media. Report your parent or carer about anyone who asks you to meet up.**
- **Take care what you want to say before posting or sending pictures or videos by yourself online.**
- **Think carefully and analyze before post something online.**
- **Respect people's view, even if you don't agree with someone else's opinion, they can have a different like you, and be more smart.**
- **If you see something online that makes you feel unsafe or worried: leave the website and tell a trusted adult immediately.**
- **Report any cyber bullying or harassment or threatening behaviour.**
- **Do not access suspicious web sites and unverified sources.**
- **Watch out for scams. Avoid and take more care about links from emails or messages that ask you to log in or share your details, even if you think they might be genuine. Do not log on into a website, apps or site directly instead.**
