1. Research-informed Literature				
Introduction	/5	/5	3 /5	/5
Literature Review	/20	/35	13 /20	/15

Comments:

Briefly explained the project & background. A more clear & concise statement could be good. Aim & objectives were clearly stated. Lit. review covered all the basics of security & types of attacks. One key element missing is top 10 security attacks of 2017/2018 ... Related to that aspect and focused research would be better approach.

2. Knowledge and Understanding of Subject				
Methodology	/5	/5	2 /5	/5
Survey Design	/15	-	-	-
Requirements/Design	-	-	-	/5

Comments:

Discussed more generic methodology. This has to be more specific to the project. Justification of why certain methodology was used.

3. Analysis				
Results & Discussions	/25	/25	14/25	/25
Conclusions and Recommendations	/10	/10	9/10	/10

Comments:

Results show the test carried out was successful. If a justification of why these attacks were chosen and relate to the review findings would have made an excellent project.

Conclusion is weak. Could have done better with the tests, and results.

4. Practical Application and Deployment				
Development	-	-	-	/15
Experimental Design	-	-	12/15	-

Comments:

Good implementation, and test were carried to good standard. ~~more~~ If more attacks were used it would have been really good project.
