

Research Participation Log 2017/2018

Level 4 Research
Methods (ECPS4001)

Study One Study Code: swan_credit_AG

Study Code: swan_credit_AG

1) Was the BPS Code of Human Research Ethics followed? (E.g. was informed consent gained? Were you aware of your right to withdraw? Was confidentiality upheld?)

Yes ☒

No ☐

If not, which guidelines were not followed?

Describe how the ethical guideline were followed?

For this study I was given a guideline to follow by signing a consent form.

Note:

How were you fully debriefed after completing the study? Were you provided with details of the researcher (e.g. email address) and given the opportunity to discuss with them after completion?

Are there any areas of improvement for this research study? (think about the materials used in the study and how the researcher carried out the study)

Name (PRINT): _____

Sign: _____

Date: _____

Briefly describe/outline the study you participated in (What were you asked to do? Did you understand the purpose before/during the study?)

_In this study I was asked to listen to five (German) voice clips (spoken, familiar melody and unfamiliar melody) each voice clip had a different German sentences / phrases no music given through headphones. I was able to listen to the voice clip more than once then go on to the next sentence which again was given in German, after each voice clip was given and listened to I had five minutes to recall these sentences and have the researcher record what I could remember, only the researcher is able to listen to my voice recording an my name would not be given just a unique code

Briefly describe your experience of taking part in this research study (positive aspects/issues that may have impacted your participation)

_I really enjoyed this study and was shocked that I was able to recall the sentences not perfect but to the best of my ability have you could remember something by only listening to it for a few moments was fascinating

How were you fully debriefed after completing the study? Were you given opportunity to discuss with the researcher after completion?

___At the end of the study I was given a debrief sheet from the researcher

Are there any areas of improvement for this research study?
(think about the materials used in the study and how the researcher carried out the study)

Nothing to improve was really enjoyable

Name (PRINT): _____ Natalie midwinter

Date: 9/3/18

Briefly describe/outline the study you participated in (What were you asked to do? Did you understand the purpose before/during the study?)

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There is a vertical margin line on the left side, creating a narrow left margin. The paper appears to be from a notebook or a standard ruled document.

Briefly describe your experience of taking part in an online research study and how this experience differed from a lab based study (positive aspects/issues that may have impacted your participation)

Study Two Study Code: swan_credit6_sjm

Study Code: swan_credit6_sjm

1) Was the BPS Code of Human Research Ethics followed? (E.g. was informed consent gained? Were you aware of your right to withdraw? Was confidentiality upheld?)

Yes ☒

No ☐

If not, which guidelines were not followed?

Describe how the ethical guideline were followed?

_For this study I was given a guideline to follow by signing a consent form

Note:

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There is no text or other markings on the paper.

How were you fully debriefed after completing the study? Were you given opportunity to discuss with the researcher after completion?

Are there any areas of improvement for this research study? (think about the materials used in the study and how the researcher carried out the study)

Name (PRINT): _____

Date: _____

Briefly describe/outline the study you participated in (What were you asked to do? Did you understand the purpose before/during the study?)

_ This was a study to determine if a person would find a symmetrical face more attractive than a non-symmetrical face, I was asked to score the faces. As based on results from previous studies results found that a symmetrical face is more attractive. I was asked to score the faces by attractiveness

All data is confidential and can't be traced back to me

Briefly describe your experience of taking part in this research study (positive aspects/issues that may have impacted your participation)

Again another interesting study as when scoring the faces I did find the symmetrical face more attractive than non-symmetrical found previously

How were you fully debriefed after completing the study? Were you given opportunity to discuss with the researcher after completion?

A study debrief sheet was given a quantitative study on gender difference perception of attractiveness of symmetrical and non-symmetrical faces email address give if we wished to contact the researcher

Are there any areas of improvement for this research study?
(think about the materials used in the study and how the researcher carried out the study)

____ Nothing to improve on this study

Study Code: swan_credit_tb1_online

Study Code: swan_credit_tb1_online

1) Was the BPS Code of Human Research Ethics followed? (E.g. was informed consent gained? Were you aware of your right to withdraw? Was confidentiality upheld?)

Yes ☒

No ☐

If not, which guidelines were not followed?

Describe how the ethical guideline were followed?

_This was an online study I had to agree to terms and conditions to participate

Note:

[illegible]

How were you fully debriefed after completing the study? Were you given opportunity to discuss with the researcher after completion?

It was an online study again I was able to email if I had any questions or if I wished to withdraw which I didn't

Are there any areas of improvement for this research study? (think about the materials used in the study and how the researcher carried out the study)

Nothing to improve on this study as stated it was a difficult study but pleased I have taken part in each one

Name (PRINT): Natalie midwinter

Date: 28.02.18

Briefly describe/outline the study you participated in (What were you asked to do? Did you understand the purpose before/during the study?)

A questionnaire based study; this study required me to answer a number of questions evaluating attitude towards unauthorised illegal immigrants, it was an online study and we were advised not to participate if we would find this study upsetting. During the study we were asked to score the questions accordingly to our feeling these would vary from giving score 1 being don't agree to the question given to 5 highly agreeing with the question

Briefly describe your experience of taking part in this research study (positive aspects/issues that may have impacted your participation)

This study was more difficult than the other two that I have written about in the log, the question asked were very tricky and some difficult to answer, I did find that some questions got me thinking is this what other people think towards unauthorised illegal immigrants and is this what I think. I found that maybe I was wrong answering some questions even though there is no right or wrong answers as it is a questionnaire
