

How to Insert Hyperlinks in a PowerPoint

Student Name: Gordana Kuzmanovic

Student ID: 2532834

Lecturer's Name: Dr Kazeem Oseni

1. Select what you want to link

Open the PowerPoint presentation, select/highlight the text, shape, or image you want to make clickable.

2. Go to Insert, Link (or press Ctrl+K)

In the top menu click Insert → Link or press Ctrl + K on your keyboard (if using Mac). This will open the hyperlink settings window.

3. Right click and choose "Link" or go to Insert - link

Insert - link

You can link either a website, another slide in your presentation or a file on your computer.

4. Paste the URL, and click OK

Paste or type the web address into URL box and click OK to apply the hyperlink.
