

Group name: Habibur Rahman , Samad Ahmed , Anila and Loba Man

Introduction

Design and creation of website related to another module managing enterprise in 21st century (BMSK4006) to advertising and promote business.

Main body

Making website design actually started Wednesday on 6/6/2018. On that day I was absent in the class because I was not well. But I requested my group friends to help me about class which I missed. My group members were very helpful so Tuesday on 12/6/2018 after finishing the class managing enterprise in 21st century we went to library. My group members taught me how make website. They explain me very well bit by bit.

There is some process need to maintain step by step. First of all we turn on computer and go google chrome then typed "BING" and enter and again typed "Weebly" then another page was appeared SET UP option. When clicked on setup option and another page appeared and asked name, email address and password. We already created Gmail account for making Blogs. As soon as we entered all details in setup option we were allowed to work on weebly website.

Now we were ready to make web design and we can saved it when we need we can sign in make a necessary amendment.

On Wednesday 13/6/2018 our class teacher gave us information about assignment after that we started work on website I followed the process above. When I signed in I found my saved work. Our work was

You needed to discuss the elements of the website than can help increase sales for your business.

a team work because another module proposal business plan managing enterprise in 21st century was group work. When we work on this module as a team on proposal business plan we choose food business. We started to make menu, downloaded picture and we can write on it.

As we decided our fast food stall in town centre in Swansea indoor market our business name is **"Himalayan Feast"** fresh, fast and economic food for everyone.

We tried to made web design to relate to above named business and we can change background colour and we tried to introduce some dishes name and pictures with explanation and prices.

On the following week (third week) we made some questioners related to proposal business plan managing enterprise in 21st century. Our group members each made 2 or 3 questions and uploaded in a blogs so another group can see our work and make a comment on it. We email these questioners within our group and sent email to our teacher. We enjoyed the class but when we tried to put in website it was very difficult for us. We tried hard but we could not successful.

Conclusion:

We really enjoyed the making website, it is useful for me and for my business. There is not enough time to learn more on particular things if there is any one can get more benefit from this.
