

1	You begin at 490816/107546. What do you find at this location and give a brief description of the site.	In Boxgrove village between a community centre, the priory (with the remains of Benedictine) and the old granary. Boxgrove is a small village with a primary school, shop and a busy road leading from Halnaker to the A27 near Chichester West Sussex.
2	Make your way southwards to 491309/102973 at Colworth. You find a feature running east/west at this location. What is this and when was it built/abandoned?	On a historic map (1870-1890) of Colworth I found the old Chichester and Arundel canal. The 1910 map showed that by this time the canal was disused.
3	Follow this feature eastwards to Barnham Court. What is the grid reference here?	SU 95532 0357
4	Following the B2233 west then a series of minor roads and lanes to 491880/106160. What is the depth to the bottom of the drift deposits here and provide a brief description of the drift deposits.	At this location there is a drift deposit made up several different materials from the quaternary period. On the map the deposit is a light yellow colour. I was unable to determine depth using digimaps.

5	Follow the minor roads to 492589/107789. Following the lane westwards across Boxgrove Common until you cross the A285. Turn right onto the A285 to 491249/108479. You encounter a linear feature here. What is it called and provide a brief description of the feature.	An old intrenchment is cut in two by the road on a map of the area in 1880, by 1960 the trench had become known as "The Devil's ditch". It spans around 1.3 miles long from East to West and is now covered by trees.
6	Continue north east up the A285. What is this feature and briefly explain why you have come to this conclusion.	When looking at the historic maps of the area I discovered that the A285 was a originally a Roman road. The road is very straight, a common attribute to Roman roads.
7	Just beyond Wearhead Farm follow the track north to Halnaker Hill (492073/109719). Besides the windmill there are two other sets of archaeological features here. What are they?	World War II searchlight emplacement and Neolithic earthwork structure known as a 'causewayed enclosure'.

8	Head back down the hill to 492316/108646. You find yourself in an old quarry know as Boxgrove. What sort of archaeology is present here and how old is the site?	This quarry has chalk bedrock and it's top layers are worked ground from the Holocene epoch period. Landscape archaeologists are interested in quarries because they can reveal how far the people of the past would and could go to get specific materials.
9	Provide a list (in chronological order) of all the sites you have visited.	https://digimap.edina.ac.uk/roam/map/os https://digimap.edina.ac.uk/roam/map/historic https://digimap.edina.ac.uk/roam/map/geology https://www.westsussex.gov.uk/leisure-recreation-and-community/places-to-visit-and-explore/halnaker-windmill/ http://www.bgs.ac.uk/Lexicon/lexicon.cfm?pub=RTDU https://www.google.co.uk/maps/search/492316,108646/@50.87266,-0.691988,218m/data=!3m1!1e3 http://www.bgs.ac.uk/products/digitalmaps/digmapgb_drift.html https://www.thoughtco.com/quarry-sites-a-archaeological-study-172276
