Marked By	Nitheesh Murugan Kaliyamurthy

Engagement with Literature Skills	20
Feedback	Marks
In this section for a student to do well, they needed to do in-text referencing from credible and relevant diversity of sources. Where possible one will be expected to critically appraise the literature engaged and apply appropriate referencing conventions. Key concepts on Types, Architecture, Features and Hardware Requirements are addressed. In-text citations done. Key concepts discussed. Critical appraisals and summaries could have added more value to your work.	15.6

Knowledge and Understanding Skills	15
Feedback	Mark
To score high marks one needed to demonstrate systematic understanding on IP Addressing - its functionalities and effectiveness. The strength of statements given and critical understanding on the Structure, Format, IPv4, IPv6 - Subnets with relevant diagrams, discussion on Hypervisor add to the score on this section. The reflection on Testing and documenting Troubleshooting methods focusing on Bandwidth, Packet Loss, Security etc are also considered. Discussions related to the advantages of Hypervisors documented. Reflections on IP Addressing done adequately.	12

Cognitive and Intellectual Skills	15
Feedback	Mark
To do well in this section one needed to demonstrate cognitive and intellectual skills by critically analysing and evaluating use cases and solutions available in the market for Hypervisor and justification of choosing a hypervisor used in practical work. There is also a need to answer the why, how and when, questions so as to give justification for arguments and judgements made throughout the work on troubleshooting IP Address conflicts, DNS resolutions, Firewall configurations, troubleshooting etc. Detailed use cases could have been discussed. Justification of choice done. Troubleshooting part addressed well.	11.6

Practical Application Skills	40
Feedback	Mark
For a student to excel they needed to provide evidence of the practical work done by using time stamped screenshots and a narrative text to accompany the screenshots. It requires the skill to know which screenshot to include as part of evidence and at the end it is actually the combination of appropriate screenshots and the narrative texts that will convince the examiner of work done. Network Topology implemented well. Initially, the network was configured wrong, however it was corrected at the end. The understanding on default gateway needs attention. IP Addressing concepts were researched well - However, the implementation doesn't prove to have adequate understanding. Why does Server need Default Gateways? Why Clients are assigned with .1 as DG?	23.5

Transferable Skills for Life and Professional Practice	10
Feedback	Mark
To score high a student needed to ensure that the document is of high quality and professionally done. There should be a good flow of ideas, with evidence of proper use of the spelling and grammar tool and a complete and neat presentation of work. The flow of the report is good. Your marks are not reduced for the comment below - you need not submit screenshots for each and every step - This was discussed during our tutorial session. Key details on the work is sufficient.	7.4
Overall Mark	70
