<u>First Marker's General Comments and Original Mark</u> Reasonable development, some good analysis, literature review covers most important areas, some sources less academic. A few important aspects of the analysis are arrived at without sufficient consideration of alternative approaches. The quality of presentation of the report is not to the required standard as it contains frequent errors and a reasonable degree of unnecessary repetition. Conclusions, recommendations, and reflections are all quite brief.	63
<u>Second Marker's General Comments and Original Mark</u> A detailed report with strong literature review. The program met all objectives set by the study.	67
<u>Comment After Consultation With Other Marker & Final Agreed Mark</u> Mark agreed.	65
