About Me

I am a highly creative individual that loves exploring new styles and drawing inspiration from them. I welcome challenges and always strive to improve my skillset. I find that my creativity is often sparked by collaborating with others and sharing ideas. I am always looking for new opportunities to expand my knowledge. Whether it's experimenting with different styles or taking on a new project, I am excited to see where my creativity will take me next.

My experience

Techniquest and CSconnected commissioned exhibit

As part of a team, I made an Interactive semi-conductor exhibit used to educate the general public, for more information please search : <https://www.cardiff.ac.uk/news/view/2570038-caldicot-students-and-techniquest-inspire-tomorrows-engineers>

Freelance graphic designer

-I have designed T-shirts for a scouts and guides society.

Surf board design

Worked along side a charity to develop a surf board for a client with cerebral palsy.

Children`s toy design

I have developed a range of childrens toys, including interactive games, a play house and an interactive network using teddy bears.

Lighting

I have designed lighting and most recently designed a light to fit seamlessly into an ikea catalogue.

Weather detection device

A revolutionary portable weather detection system used to warn about oncoming weather using onboard humidity, temperature and pressure sensors.
