

KM of Crown Record Management

Student Name: Aleksandar Mihaylov

Student ID: 2029754

Lecturer: Akinseye Aluko

Submission Date: 15/04/2023

Module: BMSW5106

Interaction of KM tools and technology with other systems

The automated categorization solution will interact with other systems through AI to support automatic categorization and cataloguing at Crown Record Management. The Cloud Based system will interact with other knowledge management system in context of accessing data added to cloud storage.

Implementation of the chosen KM system without spending much of the organisation resources

The Knowledge management system can be implemented by using much organizational resources by adopting advanced technology and taking support of experts to develop specific KM technological solutions which are relevant to the organization.

..... KNOWLEDGE MANAGEMENT

PROCESS

ADVICE

IMPROVEMENT

PEOPLE

A Purpose of KM tools / technologies

Automated Categorization: This knowledge management technology can be used by Crown Record Management for automating the cataloguing and categorize process at the organization. It serves the purpose of applying AI to improve accuracy and efficiency associated with categorizing documents so that knowledge can be stored appropriately.

Cloud Based Solutions: This knowledge management technology can be used at Crown record management to store and categorize information about a company. This serves the purpose of making digital knowledge management easier through creation of cloud system for storming and managing data digitally.

Usage of KM tools / technologies

The automated categorization solution can be easily accessed through simplistic application design with encryption protected access points only limited to department heads at Crown Record Management. On the other hand, the accesses point cloud based system will be made available to employees through their computer system in office secured with personal password for each employee to keep track of usage and security of Cloud based system.

Ways to commercialized the accumulated knowledge

Knowledge management can be accumulated and commercialized through the usage of knowledge conversion process and knowledge spiral. It will help Crown record management develop different types of knowledge and apply it for developing innovative products so that it can be commercialized.
