Piaget theory

- Sensorimotor (0-2 years)
- Preoperational (2-6 years)
- Concrete (7-12 years)
- Formal operational (12-adults)

According to Piaget ,development is constituted of 4 stages ,and each stage help us to develop as a adults.

Nursery Assistant

Working as a Nursery Assistant ,you participate along children in educational activities ,and can observe their mental develop.

For example , in a simple game with Lego cubes, you can see if children can make differences between colours, shapes .I ask the children to build a block only in colour blue. I can see that children's can make difference between colours . In this example ,children are in stage 2 (preoperational) of development .In stage 2,kids learn colours ,build blocks from Lego and to to gain trust in the people who teach them .

Conclusions

Nursery assistant is an important and fun job ,you can play while learn important things.
