

easy peasy...STEPBYSTEP...

How to Create a CHART in a Word Document

1. Open the Document:

Start by opening your Word file.

2. Go to the "Insert" Tab:

Click on the Insert tab in the ribbon menu.

3. Select "Chart":

In the Insert Illustrations group, choose the Chart option.

Select the chart style you need, such as Column or Pie.

4. Edit Data & Customize the Chart:

A linked 'Excel Sheet' will appear.

Copy and input your data here.

Use the Chart Tools to adjust colors, labels, and layout.

5. Save the Document:

Ensure all changes are saved.

Give it a Try..... Illustrative Article

WEATHER & CLIMATE

London Weather Overview for 2025: Temperature and Precipitation Rainfall

London's weather in 2025 is expected to follow its usual pattern of seasonal changes, with some notable variations in temperature and precipitation. **January** kicks off the year with chilly temperatures averaging 5°C and around 60mm of rainfall.

February sees a slight rise to 7°C, but rain remains steady at 55mm. By **March**, spring begins to show, with temperatures climbing to 10°C and rainfall easing to 50mm.

April brings milder days, averaging 14°C, and a drop in precipitation to 45mm. **May** continues the warming trend, with temperatures reaching 16°C and rainfall at 50mm.

June and July are the warmest months, with highs of 20°C and 22°C, respectively, and moderate rainfall of 55mm each month. **August** mirrors July's warmth, but rainfall increases slightly to 60mm.

September cools down to 18°C, with precipitation dropping to 50mm. **October** sees further cooling to 14°C and rainfall rising to 65mm. **November** brings a chill, with temperatures averaging 10°C and 70mm of rain.

December wraps up the year with cold days at 6°C and the highest rainfall of the year, around 75mm.

This forecast highlights London's mix of mild temperatures and consistent rainfall, making it essential to keep an umbrella handy year-round.
