The reason I choose to become a Fibre Engineer

Since childhood I was interested about computers, technology and networking.

Interested in building new network

Enthusiastic to innovative technology and about smart devices

A reasonable profit opportunity and big demand

SWOT analysis

Strengths – a broad range of practical expertise, teamwork and being initiative

Weaknesses - lack of patience, perfectionist

Opportunities – Passionate about learning new things and opportunities that role brings (travel)

Threats – Feel of not being prepared yet

Employability and Academic skills required

Employability skills:

Excellent interpersonal skills

Managing to work well under the pressure

Good decision making

Time management and organizational skills

General awareness

Academic skills:

Education

Technical expertise

Transferable skills

What I have to offer – employability skills

Over fourteen years experience in construction industry (hardworking, reliable, easy adaptive)

Knowledge of networking, cabling and data transfers from previous experience

Good problem solving skills in emergency situations

Organised, professional skill

Capable of working very well independently or in a team

What I have to offer – academic skills

- Wide range of professional courses and accreditations
- Good knowledge of digital skills
- Excellent report and sketch writing, risk management assessments
- Decision making
- Very good knowledge of mathematics

Personal development planning (PDP)

Expand my knowledge in depth

Enhance my patience with people and work

Improve my general skills for career management

Reflect critically

Increase my understanding about networking and new smart technologies

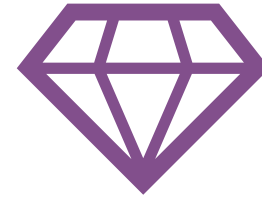

Conclusion

Hard work and dedicate to
company, team and goals

Commitment

It will be worthwhile for
sure!
