

Dyson AirForest™

Nature Meets Intelligent Air

“ We don't just build machines. We solve problems others choose to ignore. ”

— James Dyson

The Living Air Ecosystem

An AI-powered fusion of nature and technology that purifies air, enhances wellbeing and supports a sustainable future.

LIVING BIO-FILTER

Natural plants and moss capture CO₂ and absorb harmful pollutants.

AI AIR INTELLIGENCE

Real-time sensing and AI algorithms automatically adapt to your environment.

SELF-WATERING SYSTEM

Smart irrigation with water recycling for effortless plant care.

ENERGY EFFICIENT

Engineered for ultra-low energy use and solar power compatibility.

RECYCLED ALUMINIUM

Durable, repairable and made from recycled premium aluminium.

WHY AIRFOREST™ ?

CLEANER AIR

Captures 99.9% of ultrafine pollutants.

BETTER WELLBEING

Brings the calming benefits of nature indoors.

SMART CONTROL

Monitor air quality, manage settings and track impact in the MyDyson™ app.

DESIGNED FOR TOMORROW

CLEANER AIR

Natural filtration for healthier indoor environments.

SMARTER WATER USE

Closed-loop irrigation reduces unnecessary waste.

CIRCULAR MATERIALS

Built for longevity using recyclable components.

LOWER ENERGY DEMAND

Efficient airflow with intelligent power management.

MADE FOR MODERN LIVING

SMART HOMES

Seamlessly integrates with your smart home Ecosystem.

URBAN LIVING

Perfect for apartments and high-density environments.

WELLNESS

Improves focus, sleep and overall well-being.

LUXURY OFFICES

Enhances productivity and creates healthier workspaces.

SUSTAINABLE LIVING

Supports eco-conscious choices for better planet.

ABOUT DYSON

Founded in 1993, Dyson is a global technology company renowned for engineering innovative products that solve everyday problems. Its focus on research, design and sustainable innovation makes it an ideal brand for the Dyson AirForest™ concept.

Designed for the planet
Engineered for life.

MyDyson™ App

Your intelligent dashboard for cleaner air, healthier plants, and smarter sustainable living.
