Basic Digital Safety

SAFETY AT HOME

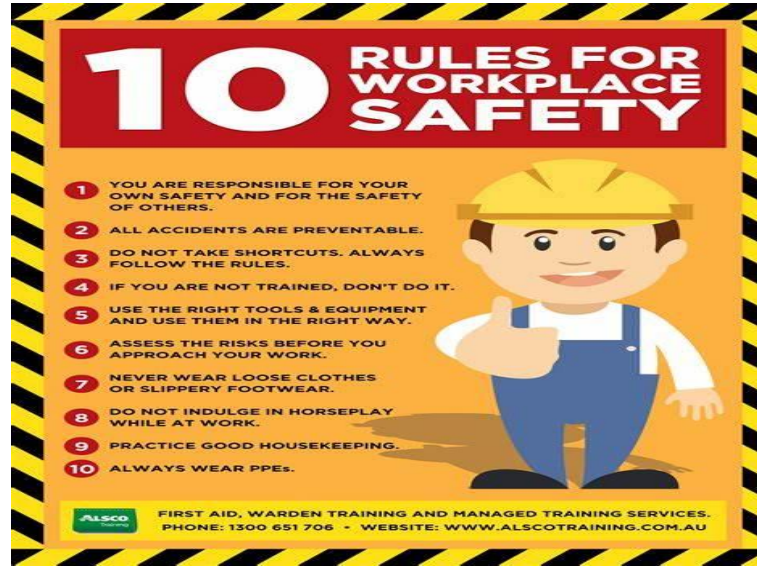

Important advice to keep your surroundings secure:

- Install smoke detectors on each floor of your house
- To avoid falls, install grab bars in bathrooms and handrails on staircases
- Electrical cords should be inspected for damage and replaced as needed
- Check your house frequently for any possible dangers, like leaks, cracks, or structural problems
- Make a list of phone numbers for emergencies.

SAFETY AT WORK

Workplace safety is essential for both employers and employees to preserve a productive and healthy work environment.

- Give every employee, including new hires and those changing roles, adequate safety training
- Employees should be given the proper personal protection equipment (PPE), such as masks, goggles, gloves, and helmets, depending on the demands of their jobs
- Hazardous items should be properly labelled, and workers should have access to safety data sheets.

SAFETY IN PUBLIC

Public safety is crucial for people's health and mental calm, as well as the wellbeing of entire communities.

- Report any suspicious or illegal conduct you come across right away to the appropriate authorities.
- Keep an eye on the people and activities around you and be aware of your surroundings.
- Whenever something feels off or unsettling, follow your instincts and act accordingly.
