

# Add a Twitter Feed to Moodle

## Step 1:

Go to the Twitter account you wish to add to Moodle, and copy the web address by highlighting and pressing **CTRL + C**. Access the settings by clicking on the small profile picture next to the **Tweet** button at the top right. Choose **Settings** and then in the left side menu **Widgets**.

## Step 2:

Click **Create new** and select **Profile**. You will then be taken to a Twitter Publisher tab. Paste the website address you copied in Step 1 into the box (**CTRL + V**). Press Return/Enter.

## Step 3:

Choose **Embedded Timeline**. You will probably wish to need to limit the height of the Twitter feed in Moodle. Click **set customization options** and set an appropriate height. Approximately 500-600 pixels should be a suitable value. Click **Update** then **Copy Code**.

## Step 4:

Go to your Moodle course and **Turn Editing On**. In the **Add a Block** block which appears, select **HTML**. Find the new block which will be called (NEW HTML BLOCK), click the cogs icon and then **Configure**.

## Step 5:

Give the block a sensible title such as "Twitter Feed" and then in the Content box click the  icon to expand the icon menu and then click the HTML icon . Paste the code you copied earlier (**CTRL + V**) and then **Save changes**.

## Step 6:

You will now see your Twitter feed appear on your module page.

Create new

What would you like to embed?
