

Digital Skills Assignment

The six apps I mostly use on social media are:

- WhatsApp
- TikTok
- Facebook
- Instagram
- Emails
- LinkedIn

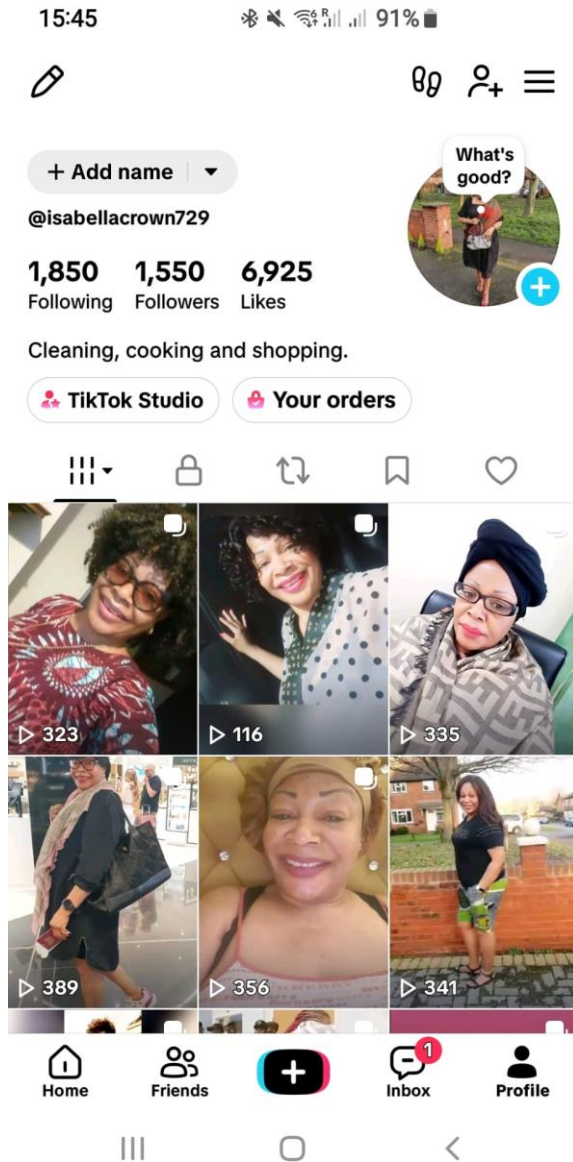

I want to improve on how to use a computer in general.

1)WhatsApp.

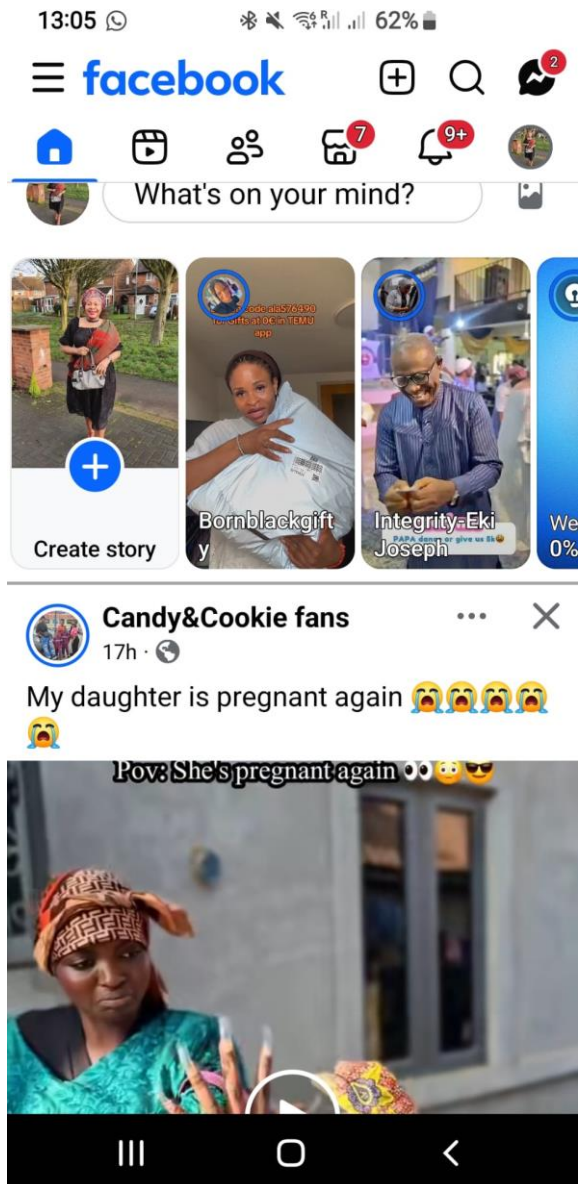

I use WhatsApp mostly, among the six social media apps that I use.
I always make calls for free and upload my statuses.

2)TikTok.

On TikTok, i buy and sell, upload pictures and videos, and watch other people's content.

3)Facebook.

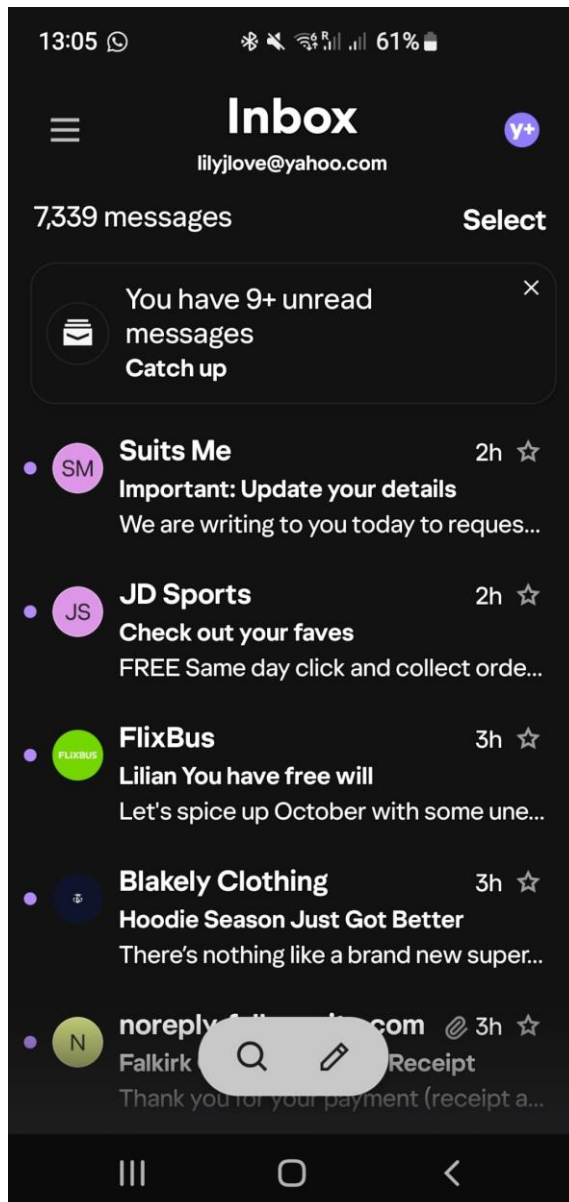

I upload pictures and videos, meet my old school friends, and make new friends. I also buy things from Facebook marketplace, watch movies, and make new friends.

4)Instagram.

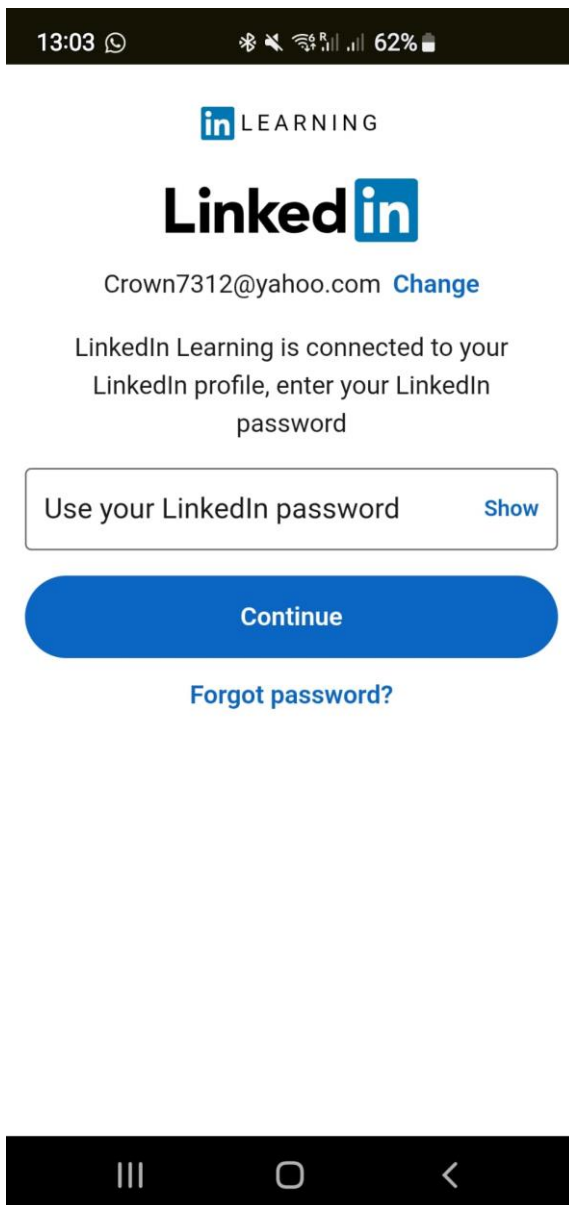

I meet old friends, make new friends, listen to new music, and read some posts posted by others on Instagram.

5)emails.

I send and receive emails.

6)LinkedIn.

The screenshot shows the LinkedIn Learning login interface on a mobile device. At the top is a black status bar with the time 13:03, a speech bubble icon, and various system icons including Bluetooth, Wi-Fi, cellular signal, and a 62% battery level. Below the status bar is the LinkedIn Learning logo, consisting of the 'in' icon and the word 'LEARNING'. The main logo 'LinkedIn' is displayed in a large, bold font. Underneath the logo, the email address 'Crown7312@yahoo.com' is shown with a 'Change' link. A message states: 'LinkedIn Learning is connected to your LinkedIn profile, enter your LinkedIn password'. There is a text input field containing 'Use your LinkedIn password' and a 'Show' link. Below this is a large blue 'Continue' button. At the bottom of the form is a 'Forgot password?' link. The entire form is centered on a white background. At the very bottom of the screen is a black navigation bar with three white icons: a hamburger menu, a home button, and a back arrow.

I meet some businesspeople and search for jobs.

Reflection:

Submitting my work was a challenge for me because I'm not used to using the computer and the internet in my house as I just moved to a new place. I numbered all the key points and saved them on OneDrive as I was reading and finding information. The effect and impact of social media platforms like Facebook, TikTok and Instagram are the main supporting examples in the whole text. One key point that supports the ideas is the recorded government business data in 2025, more than 250 million people using Facebook, Instagram and other social media to reach out to customers. This is another key point that supports the main idea, how Linda Hunter, who had run physical sales across Essex, Kent and London for 46 years, was able to become an online vendor after closing her store. What I found difficult in this task, including the in-class component was using the computers. It was very difficult for me because I'm not good with computers, and I just moved to a new home where there is no internet yet, so it was hard for me to use my phone as well. I was able to resolve it by going to the library to sort it out.
