Marked By	Nitheesh Murugan Kaliyamurthy

Engagement with Literature Skills		40
Feedback		Marks
In this section to do well, you need to do in-text referencing from credible, relevant and diverse academic and industry sources for Network Automation Frameworks, Tools, API Standards and Architecture, its security and compliance policies and various resources available. Where possible you will be expected to critically appraise and summarise the literature engaged and to apply appropriate referencing conventions. Key concepts discussed. However, more efforts required. Diverse academic/ industry sources and materials not used. Your reference links 1 & 2 to one resource. Why is it referenced that way? More diversity of academic sources like peer reviewed journals, conference proceedings, etc and their summaries and critical appraisals could have added value to work.		17

Knowledge and Understanding Skills		30
Feedback		Mark
To score high marks you need to demonstrate systematic understanding of network automation frameworks, tools, standards, architecture and its importance. The strength of statements need to reflect clearly the underlying principles, and critical understanding of concepts with appropriate examples and adequate figures/ diagrams. More clarity in statements required. "don't need to manually change it as it will do this can send the code somewhere else for a different automation" - Your understanding here needs more clarity. Referring to more diverse literatures/ resources could have given better insight. Discussed about tools like Webdriver, Cypress etc. However, more explanation required. Your statement "intelligent network automation uses machine learning and big data to configure and manage network" needs more discussion. Maybe an example to endorse your statement could have added value.		16

Cognitive and Intellectual Skills		20
Feedback		Mark
To do well in this section you need to demonstrate cognitive and intellectual skills by critically analysing and evaluating Network Automation frameworks, tools, standards and architectures. There was also a need to address similar resources (where available, what is the cost, etc), with adequate arguments and judgements. Critical review on security, compliance policies and API security and privacy required. More critical analysis on Framework, Standards and Architecture required. Discussed about Devnet resources. However, more discussion on similar resources required. More clarity and review could have added value to your discussion on security.		10.6

Practical Application Skills		0

Not Applicable		0

Transferable Skills for Life and Professional Practice		10
Feedback		Mark
To score high you need to ensure that the document is of high quality and professionally done. There should be a good flow of ideas , with evidence of proper use of the spelling and grammar tool and a complete and neat presentation of work. Marks for the structure of the document were also considered in this section. Formatting needs focus. Long paragraphs need to be avoided. Could have added chapter/ sub-heading numbers. Use of tables and figures could have improved your report.		6
Overall Mark		50
