Module Learning Outcomes (from module syllabus)

- Demonstrate a systematic understanding, including acquisition of coherent and detailed knowledge of intercultural communication theories
- Evaluate and interpret divergent international cultures within business

TASK DESCRIPTION

You work as a Business Advisor that provides guidance and advice to business organisations that are wanting to expand their enterprises to global markets.

You have been commissioned by a furniture manufacturer who have asked for your assistance as they are aiming to expand their business to the Middle East from the UK. Therefore you are required to inform your client of the intercultural communication theories and make them aware of the different international cultures as they expand their business.

Task

Individually you are required to produce a **2500 word report** for your client, discussing the skills needed to communicate effectively in an international business context while remaining sensitive to cultural differences. You should pay particular attention to the skills required for building strong professional relationships with key partners in the Middle East, and also consider how a breakdown in business communication could affect that relationship, offering possible explanations for why such failures might occur.

Your report should also highlight the differences in culture that your client should be aware of so that your clients can build appropriate professional relationships with their global partners.

Please remember to use appropriate academic theories to support your reasoning.

Notes

Your report should contain a Front Cover, Executive Summary, Content Page, Introduction, Main Findings, Conclusions, Recommendations, Appendices (if appropriate) which is support by 25 academic references. Within your report, you should consider what international business communication is, the skills required for international business communication, methods of communication, effective communication, the importance of relationship building, why might relationships fail, what culture is, the components of culture, Halls High Low Context, Trompenaars's 7 dimensions to culture, how to build trust.

GUIDANCE FOR STUDENTS IN THE COMPLETION OF TASKS

NOTE: The guidance offered below is linked to the five generic assessment criteria overleaf.

1. Engagement with Literature Skills

Your work must be informed and supported by scholarly material that is *relevant* to and *focused* on the task(s) set; you should make use of scholarly reviews and primary sources, where appropriate (for example, refereed research articles and/or original materials appropriate to the discipline). You should provide evidence that you have accessed a wide *range* of sources, which may be academic, governmental and industrial; these sources may include academic journal articles, textbooks, current news articles, organisational documents, and websites. You should consider the *credibility* of your sources; academic journals are normally highly credible sources while websites require careful consideration/selection and should be used sparingly. Any sources you use should be current and up-to-date, mostly published within the last five years or so, though seminal/important works in the field may be older. You must provide *evidence* of your research/own reading throughout your work, using a suitable referencing system, including in-text citations in the main body of your work and a reference list at the end of your work.

Guidance specific to this assessment: *You need to undertake extensive reading/research accessing different media types including text books, academic journals and limit use of websites. A minimum of 25 sources must be included to support the report.*

2. Knowledge and Understanding Skills

At level 6, you should be able to demonstrate coherent and detailed knowledge and a systematic understanding of the subject area, at least some of which is informed by the latest research and/or advanced scholarship within the discipline. You should be aware of the uncertainty, ambiguity and limits of knowledge. Your work must demonstrate the growing extent of your knowledge and systematic understanding of concepts and underlying principles associated with the subject area. *Knowledge* relates to the facts, information and skills you have acquired through your learning. You demonstrate your *understanding* by interpreting the meaning of the facts and information (knowledge). This means that you need to select and include in your work the concepts, techniques, models, theories, etc. appropriate to the task(s) set. You should be able to explain the theories, concepts, etc. meaningfully to show your understanding. Your mark/grade will also depend upon the *extent* to which you demonstrate your knowledge and understanding; ideally each should be complete and detailed, with comprehensive coverage.

Guidance specific to this assessment: *You should demonstrate knowledge and understanding of communication and culture that is supported by appropriate academic theory.*

3. Cognitive and Intellectual Skills

You should be able to: critically evaluate evidence, arguments, assumptions, abstract concepts and data some of which are at the forefront of a discipline (and that may be incomplete) to devise and sustain arguments, to make judgements and/or solve problems; describe and comment upon particular aspects of current research, or equivalent advanced scholarship, in the discipline. Your work must contain evidence of logical, analytical thinking, evaluation and synthesis. For example, to examine and break information down into parts, make inferences, compile, compare and contrast information. This means not just describing what! But also justifying: Why? How? When? Who? Where? At what cost? At all times, you must provide justification for your arguments and judgements. Evidence that you have reflected upon the ideas of others within the subject area is crucial to you providing a reasoned and informed debate within your work. Furthermore, you should provide evidence that you are able to make sound judgements and convincing arguments using data and concepts. Sound, valid conclusions are necessary and must be derived from the content of your work. Where relevant, alternative solutions and recommendations may be proposed.

Guidance specific to this assessment: *Key concepts should not only be identified and described, but there should be an element of evaluation included also.*

4. Practical Skills

At level 6, you should be able to apply the methods and techniques that you have learned to review, consolidate, extend and apply your knowledge and understanding, and to initiate and carry out projects. You will deploy accurately established techniques of analysis and enquiry relevant to the discipline, and apply

them in complex and unpredictable contexts, to devise and sustain arguments and/or to solve problems. You should be able to frame appropriate questions to achieve a solution - or identify a range of solutions. You should be able to demonstrate how the subject-related concepts and ideas relate to real world situations and/or a particular context. How do they work in practice? You will deploy models, methods, techniques, and/or theories, in that context or circumstances, to assess current situations, perhaps to formulate plans or solutions to solve problems, or to create artefacts, some of which may be innovative and creative. This is likely to involve, for instance, the use of real world artefacts, examples and cases, the application of a model within an organisation and/or benchmarking one theory or organisation against others based on stated criteria. You should show awareness of the limitations of concepts and theories when applied in particular contexts.

Guidance specific to this assessment: Key themes should be practically applied to the case study industry. A link between the theory and practical examples should also be included.

5. Transferable Skills for Life and Professional Practice

Your work must provide evidence of the qualities and transferable skills necessary for graduate-level employment requiring the exercise of initiative and personal responsibility and decision-making in complex and unpredictable circumstances. This includes demonstrating: the learning ability for professional development to advance existing skills and acquire new competences of a professional nature that will enable you to assume significant responsibility within organisations; that you can initiate and complete tasks and procedures, whether individually and/or collaboratively; that you can use appropriate media to effectively communicate information, arguments and analysis in a variety of forms to specialist and non-specialist audiences; fluency of expression; clarity and effectiveness in presentation and organisation. Work should be coherent and well-structured in presentation and organisation.

Guidance specific to this assessment: Your report should be written in UK English and presented in an appropriate report structure.

STUDENT FEEDBACK FORM

This section details the *extent* to which the assessment criteria are demonstrated by you, which in turn determines your mark. The marks available for each category of skill are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Module Learning Outcomes (from module syllabus)
- Analyse international business communication situations - Critically select strategies to overcome potential challenges in business communications

TASK DESCRIPTION

With the use of an academic model of reflection, you are required to write a 2500 word reflective essay that:

1. Analyses international business communication situations
2. Critically select strategies to overcome potential challenges in business communications

Task

Choose a country other than your home country and, drawing on your own experience or a realistic case scenario, analyse the business communication challenges that a UK based organisation might encounter when operating there. You should then identify strategies to address these challenges and critically evaluate them, drawing conclusions from your reflection and recommending which strategy would be most effective.

Notes

As this is a reflective essay you are permitted to write in the 1st person. An academic model of reflection should be used to structure your work. Your essay may contain a Front Cover, Introduction, IBC Situations, Strategies to Overcome, Conclusion, Recommendations, References.

GENERIC ASSESSMENT CRITERIA

Level 6

In accordance with the Framework for Higher Education Qualifications, at the end of Level 6 students should have coherent and detailed knowledge and a systematic understanding of their subject area, at least some of which is informed by the latest research and/or advanced scholarship within the discipline. They will be able to accurately deploy established techniques of analysis and enquiry within a discipline, using their conceptual understanding to devise and sustain arguments and/or to solve problems. They should be aware of the uncertainty, ambiguity and limits of knowledge. They should be able to critically evaluate evidence, arguments, assumptions, abstract concepts and data (that may be incomplete), to make judgements, and to frame appropriate questions to achieve a solution - or identify a range of solutions. They will apply the methods and techniques that they have learned to review, consolidate, extend and apply their knowledge and understanding, and to initiate and carry out projects. They will have the ability to manage their own learning, and to make use of scholarly reviews and primary sources (for example, refereed research articles and/or original materials appropriate to the discipline). They will demonstrate the qualities and transferable skills necessary for employment requiring: the exercise of initiative and personal responsibility; decision-making in complex and unpredictable contexts; the learning ability needed to undertake appropriate further training of a professional or equivalent nature.
