

Understanding Stakeholder Perspectives on Carbon Savings from EPS

As part of my final year project I am investigating the impact that the implementation of the Electronic Prescription Service in Wales has had on carbon emissions. I am looking at the carbon savings from reduced patient travel and paper usage. Spatial statistics, statistical modelling, and an interactive dashboard will be used to investigate and display results.

This questionnaire is to gather feedback on how relevant and understandable the project is, and whether it is believed the results could encourage wider adoption of EPS across other regions, or inform policy decisions. Your input is greatly appreciated and will help shape the final evaluation.

1. Do you think that the general public would be interested in understanding carbon savings in healthcare? *

- ☐ Yes
- ☐ No
- ☐ Not sure

2. Who do you think would be most interested in this type of information? (Select all that apply) *

- ☐ Policy makers
- ☐ NHS Staff
- ☐ Patients
- ☐ Environmental organisations
- ☐ Researchers
- ☐ Other

3. How useful do you think a visual dashboard showing EPS-related carbon savings would be for your role or team? *

- ☐ Extremely useful
- ☐ Somewhat useful
- ☐ Not useful
- ☐ Not sure

4. Would you find it helpful for the dashboard to include comparisons between different sites or time periods? *

☐ Yes

☐ No

☐ Not sure

5. Would you expect to see actionable change implemented based on the findings from this investigation? *

☐ Yes

☐ No

☐ Not sure
