

BASIC DIGITAL SAFETY

STUDENT NAME : GALYNA VOVK
STUDENT ID: 2337083
MODULE NAME: DIGITAL SKILLS
MODULE CODE: LCLM4002
LECTURE NAME: JAYA GOPALKRISHNAN

Generate strong passwords by incorporating a combination of letters, numbers, and special characters. Steer clear of using easily predictable details such as birthdays or common words.

STRONG PASSWORDS

Use two-factor authentication. Increase your protection by requiring an additional verification method besides your password.

TWO-FACTOR AUTHENTICATION

Consistently keep your operating system, application, and antivirus software up to date defend against the latest risks.

KEEP SOFTWARE UPDATED

Consistently save important data to an external hard drive or cloud storage for safekeeping.

BACKUP YOUR DATA

Be careful when disclosing personal details on internet, particularly on social media platforms.

LIMIT SHARING PERSONAL INFORMATION

Ensure device security with a lock screen password, PIN, or biometric authentication. Install antivirus software and perform regular scans.

SECURE YOUR DEVICE

Make it a habit to inspect your financial and online accounts for any irregularities.

MONITOR YOUR ACCOUNTS
