Introduction

Hello. I am currently studying computing. I am here to do self-evaluations about my academy Performance. Over the years, I have improved in my studies, especially in previous assignment. I have built strong relationship with my peers and teachers, which helped me, to work more effectively in groups and seek guidance when needed. I am confident in my understanding of the work; I will need to contribute more to class discussions to both learning and my class groups. I aim to explore more effectively study methods, such as using mind map and Wix to get better information and prepare for more exams efficiently. Although I meet deadlines, I sometimes delay starting tasks or put my chores on last minutes which can lead to unnecessary stress. I am to break this habit by starting my assignment earlier. To achieve higher grades in my course I plan to dedicate an additional two 0hours daily to focused study and revision. I will seek guidance from teachers to develop better study techniques and for exam preparation.
