LITERATURE REVIEW FOCUS

Research Aim

Research Objective

Research Question

METHODS

- What did you do? (primary or secondary research)
- What Keywords did you use for your search?
- What your Specific Sources of Data?
- What were your Data sources?

KEY FINDINGS

- What were the Key findings?
 1. Abusive behaviour or negligence toward the children, the mental health development of the children is disturbed at child develops altered psychology that mostly drives them to adopt the wrong influences
 2. If the children are mistreated in their earlier life by the family members or from any other sources, It directly impacts health development of the children
 3. The rate of criminal convictions of adolescents is higher for those who has difficulties during their mental health development childhood because of abusive or another form of maltreatment

KEY THEMES

- Key themes did you identify?
 1. The way children are treated during their childhood period determines how individuals at their teen-ages would perceive things
 2. Maltreatment to their brought-up process by the family members or parents results in challenging mental and physical development of the children
