DOUBLE ARM WEIGHTED HOLD

DIFFICULTY

1

- Stand in the centre of your resistance equipment
- Keep your back straight and bend your legs as you lift the equipment (as a deadlift-see card)
- Take a good tight grip and hold weight by your sides

- Stand tall and pop your hips through at the top (contract **glutes** to lockout)
- Brace your abs-imagine you are going to be punched in the stomach
- Keep your shoulders back and pull your chest out (big proud chest)
- Keep your hips square

- Keep your head in neutral position looking forward
- Hold the weight for desired time
- Lower the weight carefully to the floor by bending your legs-keep your back straight

POINTS ZONE
