

Membership Procedure for Ordnance, Munition and Explosives (BEng) Apprentices.

1. Background

- 1.1 The OME Apprentices have received extensive education and training in explosives on the job during their apprenticeship and at the University Wales Saint Trinity David.
- 1.2 The Apprentices attend a 4-year Ordnance, Munition and Explosives (BEng) Apprenticeship with the University of Wales Saint Trinity David.
- 1.3 The design, use and disposal of ordnance, munitions, and explosives (OME) is vital to national defence interests and global treaty obligations. This underpins the requirement for expertise in explosives, their engineering, and their responsible regulation. A BEng in OME will provide you with an understanding of weapon systems from initial concept, design, and manufacture to their considerations of use in operational service, and final disposal at end of useful life.

2. IExpE Membership

- 2.1 IExpE student membership is awarded as part of the University Course Accreditation with the Institute, to all OME Apprentices and will be offered the opportunity to upgrade to Member after graduation.
- 2.2 Upon upgrading to Member full membership subscription charges apply.

3. Procedure

- 3.1 The employer and the university will provide a reference to confirm employment and education using the application form provided by IExpE.
- 3.2 The completed form is submitted to the IExpE administration office.
- 3.3 IExpE will maintain a diary record of all students entering IExpE membership, recording their course graduation dates.
