TASK DESCRIPTION

Task 1 (1500 Words)

As part of an individual assignment you are required to use blogs as part of the communication activities for your chosen project. A series of blog posts (between 6 and 10, 1500 words in total) should be created to communicate with your target audience. The specific aim should be focused on creating and increasing awareness of your project as well as stimulating a dialogue between your chosen company and your audience.

When developing your blog posts you should give consideration to key elements of marketing mix theory in relation to the way in which you plan, develop, and execute your communications. You can be as creative as you want in relation to the blog posts and you should also develop mechanisms for engaging with your audience through encouraging them to ask questions and leave comments.

Please note: A final copy of all posts will be required to be uploaded on Turnitin in a word document by the submission deadline.

GUIDANCE FOR STUDENTS IN THE COMPLETION OF TASKS

1. Research-informed Literature

Your work must be informed and supported by scholarly material that *is relevant* to and *focused on* the task(s) set. You should provide evidence that you have accessed a wide *range* of sources, which may be academic, governmental and industrial; these sources may include academic journal articles, textbooks, current news articles, organisational documents, and websites. You should consider the *credibility* of your sources; academic journals are normally highly credible sources while websites require careful consideration/selection and should be used sparingly. Any sources you use should be current and up to date, typically published within the last five years or so, though seminal works in the field may be older. You must provide *evidence* of your research/own reading throughout your work, using in-text citations in the main body of your work and a reference list that is alphabetical at the end of your work. Please use the Harvard referencing system.

Specific to this assignment: *You should show a wide level of reading, a minimum of 14 references, from a variety of sources including textbooks, academic journals and academic based websites. You must reference Kotler & Armstrong 15th/16th edition as your primary source for theory.*

2. Knowledge and Understanding of Subject

Your work must demonstrate the growing extent of your knowledge and understanding of concepts and underlying principles associated with the subject area. *Knowledge* relates to the facts, information and skills you may have acquired through your learning. You must demonstrate your *understanding* by interpreting the meaning of facts and information (knowledge). This means that you need to select and include in your work the concepts, techniques, models, theories, etc appropriate to the task set. You should be able to explain the theories, concepts, etc meaningfully to show your understanding. Your mark/grade will also depend upon the extent to which you demonstrate your knowledge and understanding; ideally each should be complete and detailed, with comprehensive coverage.

3. Analysis

Your work must contain evidence of logical, analytical thinking, evaluation and synthesis. For example, to examine and break information down into parts, make inferences, compile, compare and contrast information. This means not just describing *What!*, but also justifying: *Why? How? When? Who? Where?* At all times, you must provide justification for your arguments and judgements. Evidence that you have reflected upon the ideas of others within the subject area is crucial to you providing a reasoned and informed debate within your work. Furthermore, you should provide evidence that you are able to make sound judgements and convincing arguments using data and concepts. Sound, valid conclusions are necessary and must be derived from the content of your work. There should be no new information presented within your conclusion. Where relevant, alternative solutions and recommendations may be proposed.

4. Practical Application and Deployment

You should be able to demonstrate how the subject-related concepts and ideas relate to real world situations or a particular context. How do they work in practice? You will deploy models, methods, techniques, and/or theories, in that context, to assess current situations, perhaps to formulate plans or solutions to solve problems, some of which may be innovative and creative. This is likely to involve, for instance, the use of real world examples and cases, the application of a model within an organisation and/or benchmarking one organisation against others based on stated criteria. You should show awareness of the limitations of concepts and theories when applied in particular contexts.

5. Skills for Professional Practice

Your work must provide evidence of your attributes in the application of professional practice. This includes demonstrating that you are highly capable of individual and collaborative working. You must communicate effectively in a suitable format, which may be written and/or oral, for example, essay,

management report, presentation. Work should be coherent and well-structured in presentation and organisation.

Specific to this assignment: *Your essay needs to be fully referenced. Please consult the referencing guides available online or in the library. Use 12 Times New Roman or 11 Arial, 1.5 line spacing. Number your pages. The essay should not be longer than 2500 words.*

Lack of logic, leading to unsupported/missing conclusions. Lack of any attempt to analyse, synthesise or evaluate.	Some evidence of analytical intellectual skills, but for the most part descriptive. Ideas/findings sometimes illogical and contradictory. Generalised statements made with scant evidence. Conclusions lack relevance.	Evidence of some logical, analytical thinking and some attempts to synthesise, albeit with some weaknesses. Some evidence to support findings/ views, but evidence not consistently interpreted. Some relevant conclusions and recommendations, where relevant	Evidence of some logical, analytical thinking and synthesis. Can analyse new and/or abstract data and situations without guidance. An emerging awareness of different stances and ability to use evidence to support the argument. Valid conclusions and recommendations, where relevant	Sound, logical, analytical thinking; synthesis and evaluation. Ability to devise and sustain persuasive arguments, and to review the reliability, validity & significance of evidence. Ability to communicate ideas and evidence accurately and convincingly. Sound, convincing conclusions / recommendations.	Thoroughly logical work, supported by evaluated evidence. High quality analysis, developed independently or through effective collaboration. Ability to investigate contradictory information and identify reasons for contradictions. Strong, persuasive, conclusions, justifiable recommendations.	Exceptional work; judiciously selected and evaluated evidence. Very high quality analysis, developed independently or through effective collaboration. Ability to investigate contradictory information and identify reasons for contradictions. Highly persuasive conclusions
4. Practical Application and Deployment Effective deployment of appropriate methods, materials, tools and techniques; extent of skill demonstrated in the application of concepts to a variety of processes and/or contexts; formulation of innovative and creative solutions to solve problems.	Limited or no use of methods, materials, tools and/or techniques. Little or no appreciation of the context of the application.	Rudimentary application of methods, materials, tools and/or techniques but without consideration and competence. Flawed appreciation of the context of the application.	An adequate awareness and mostly appropriate application of well established methods, materials, tools and/or techniques. Basic appreciation of the context of the application.	A good and appropriate application of standard methods, materials, tools and/or techniques. Good appreciation of the context of the application, with some use of examples, where relevant.	A very good application of a range of methods, materials, tools and/or techniques. Very good consideration of the context of the application, with perceptive use of examples, where relevant. Evidence of some innovation and creativity.	An advanced application of a range of methods, materials, tools and/or techniques. The context of the application is well considered, with extensive use of relevant examples. Application and deployment extend beyond established conventions. Innovation and creativity evident throughout.	Outstanding levels of application and deployment skills. Assimilation and development of cutting edge processes and techniques.
