

MARKING CRITERIA and STUDENT FEEDBACK

This section details the assessment criteria. The *extent* to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Common Assessment Criteria Applied	Marks Available	Marks Awarded
General Comments		
Research exercise on SQL Injection make for good reading and discussions made have been implemented in your development. With regards to the site itself, you have managed to carried out "CRUD" on each table, therefore you have a solution. However, there was some expectation that data should be linked across each table - otherwise this is a basic solution. Data grids are fine, but as mentioned in lectures, you should only show "key" data and when viewing/editing data all data should be shown. As this is your first data driven website, you just need to reflect on your "solution" and understand how to make this more functional	100	64
1. Engagement with Literature Skills		
Good activity that relates to the issues with SQL Injection and how to overcome the issue.	15	13
2. Knowledge and Understanding Skills		
Database solution is fine as a set of tables, but as there are no related elements, this does not score well (see rubric on this)	10	5
3. Cognitive and Intellectual Skills		
Your report does detail how hacking can occur on your website (is demonstrated) and also shows due process on how to protect the site from an injection. This is complementary to your developed solution where prepared statements are extensively implemented	15	15
4. Practical Application Skills		
Considering the "theme" of this assignment is the demonstration of CRUD to 3 related tables. You have successfully managed to manage data, but there is no related data (did you read the rubric), with this in mind, credit has been given where possible. Chart are useful/useless and finding it difficult to understand their importance, especially on the anime graph - if you add more rows of data, rendering the graph is somewhat problematic. Validation of data is present, but you should have more relevant checks.	60	31
5. Transferable Skills for Life and Professional Practice		

Assignment Mark (Assessment marks are subject to ratification at the Exam Board. These comments and marks are to give feedback on module work and are for guidance only until they are confirmed.)
