

VOTING & POLLING

LIVE

Students contribute ideas and/or express opinion whether open-ended or by selection from a given set of choices.

Key Enhancements

- Scalability—all students can contribute simultaneously
- Visually engaging
- Discreet—students who dislike public speaking are more likely to contribute

Recommended Templates

Brainstorm

Suitable for an open-ended vote where students submit suggestions to a question posed orally.

Graph

A vote with a given set of choices. Students select their choice and the results are updated live by way of a bar graph, pie chart or tally as chosen by the lecturer.

Tip: Always set a timer for a Graph activity, otherwise voters can change their minds indefinitely, making discussion of the results difficult.

Try Also...

Nearpod and Socrative are two recognised alternatives to Wordwall.
