STUDENT FEEDBACK FORM

This section details the *extent* to which the assessment criteria are demonstrated by you, which in turn determines your mark. The marks available for each category of skill are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Generic Assessment Criteria	Marks available	Marks awarded
1. Engagement with Literature Skills		
You have a reasonable range of sources and you cross reference them in the text.	20	13
2. Knowledge and Understanding Skills		
I enjoyed your very personal account. You connected your personal experience to the wider issues of homelessness and the need for healthy environments. The diversion into Frank Gehry and the brief comment on historical architecture sat uneasily in the centre of the essay. They broke the biographical narrative – they would have been better pushed to the back of the essay –or possibly omitted to allow you more space to develop your central theme of the social role of architecture.	15	11
3. Cognitive and Intellectual Skills		
This is a good account of your reasons for studying architecture. You record your personal experiences and motivations well. You also link these personal experiences to wider issues and back these up with quotations and graphs.	20	12
4. Practical Application Skills		
You need to read back carefully through your text – there are quite a few typos. Generally your writing is clear and concise – the weakest part is the section on Gehry where your grammar gets rather loose.	25	13
5. Transferable Skills for Life and Professional Practice		
	20	12

The set question is 'why study architecture today' - you appear to have morphed this into 'Why I study architecture today'. This is probably because you have addressed your response on a very personal level. You must be sure in future to state the question correctly. However, on this occasion I think you have adequately addressed the set question within your text.
