Andre Leroi-Gourhan
 "Les religions de la prehistoire"

Yves Lomax
“Figure, calling”

“SO MANY SEPARATIONS hourly, daily, monthly. We live, think and act so many splits and, worse still, we form attachment to them”

Yves Lomax

“Figure, calling” p36

“WORDLY RELATIONS are cut through and through with division, separations and partitions. It is artifice- for the sake of identity, government, management and economy.”

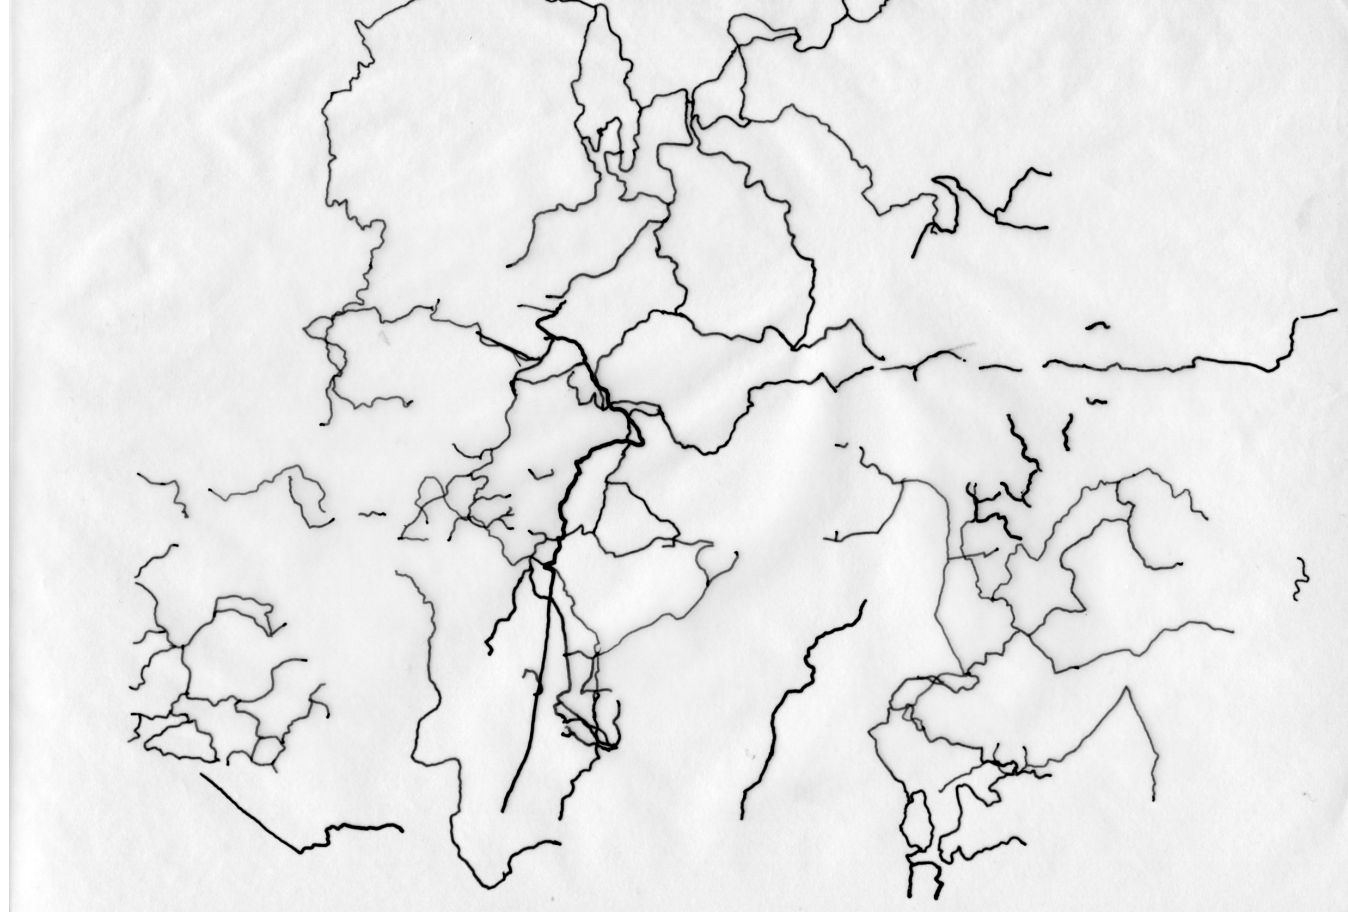

Yves Lomax

“Figure, calling” p38

“The community formed by what is left as the division producing ‘us’ and ‘them’ id divided [...] the division producing identity (citizen, human) and separation (non-citizen, non-human) becomes divided”.

Yves Lomax

“Figure, calling” p47

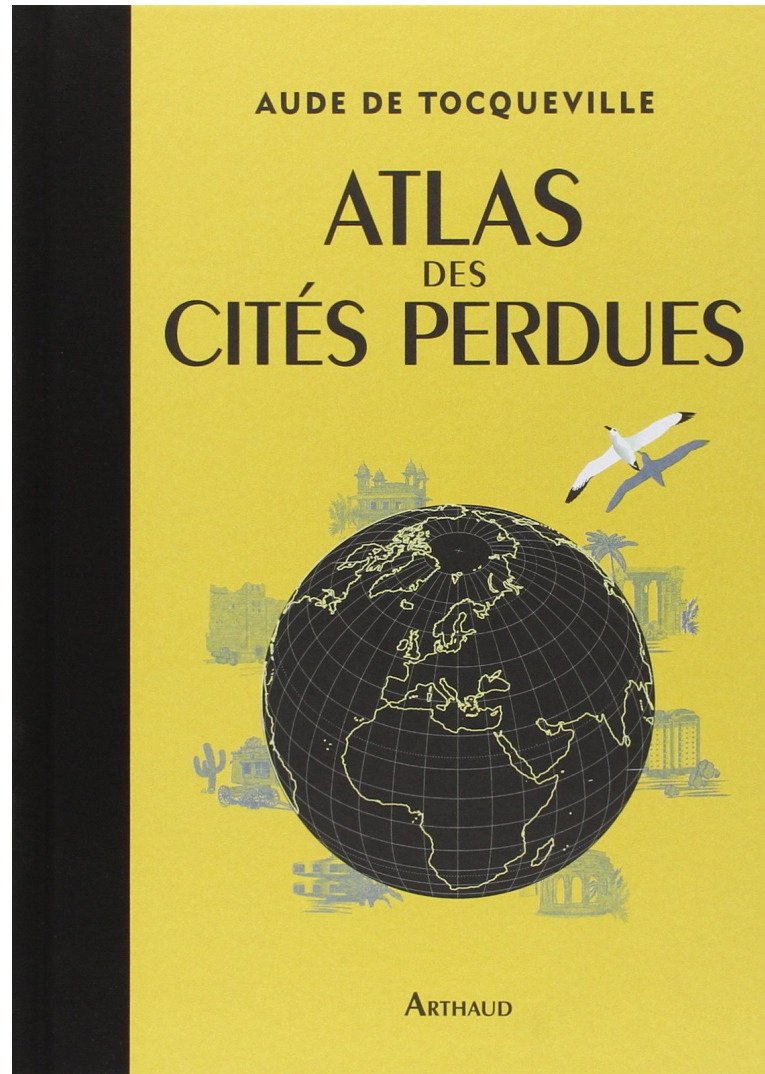

“Ever-newer water flows on those who step into the same river”

(Heraclitus, 535BC-475BC)

“Il n’y a pas d’image, il n’y a que des rapports entre les images.”

Jean-Luc Godart

“La disjoncture, n’est-ce pas la possibilite meme de l’autre?”

Jacques Derrida

“Photographers from different generations build their work upon the principle of echo , interaction, connection between different photographs, creating photographic constellations”

Anne Immele

“Photographic constellation”

In engineered nuclear devices, essentially all nuclear fission occurs as a "nuclear reaction" — a bombardment-driven process that results from the collision of two subatomic particles. In nuclear reactions, a subatomic particle collides with an atomic nucleus and causes changes to it.

“Today the constellation layouts have taken over the photographic sequence, they play on a temporal and spatial deployment. These constellations adopt moving and rhythmic forms which transcripts an experience of the world. In these contemporary layouts, the passages between photographs happens upon connexions from collisions or contaminations”

Anne Immele
