

For assignment 2, I would like to remind you about our past activities. You need this data and information for your arguments in Assignment 2.

If you check session 5.1: It says:

You should have collected DATA about yourself (Grit and education level). You now have a grit score (0-5). You also have the highest level of academic achievement according to the UK government. If you haven't gone back and get it now. You will need this very soon!

Session 4.3 Finding More CRAAP papers for your assignment (You will find Angel's TED talk)

Exercise 4.4 Angela Duckworth's Grit Survey (You can get your GRIT score here)

Session 4.5 Researching Academic Level (You can find your highest Academic Score / Level here)

Exercise 4.5.1 UK Qualifications Comparison Guide (You can find your highest Academic Score / Level here)

To collect data, we have tried and practised using MS 365 FORM, then you know how to design a FORM and send/share your Form (Survey). (Session 5 is explaining these steps and you can watch some videos recorded by Paul)

Watch session 5.1 and create your FORM (Your survey) and ask your classmates about their education level and their GRIT number (Please watch Paul's video). Please watch the video (Session, 5.1, where Paul explained how to create the survey using FORM and sending the form to your friends (classmates).

You need to collect this data/information as you are going to use them. You will use this collected data/information to draw your Excel Chart. (This is going to be your Primary Data). I will also try to collect the same data from students (on behalf of you) and will share it with you (This will be your Primary Data and if you could not collect enough data, then you can use it as your Primary Data)

Session 5.2, shows how to share the survey (FORM). This is your Primary data collection (If you remember, you have shared your FORM with me during this session and you were successful.

In session 7 there is an Excel file (below). This is your secondary data provide by UWTSD (Students GRIT and Education Level in the year 2020) and you are going to compare your collected primary data.

Session 7: Data from UWTSD 2020 Grit Survey TO BE SHARED WITH STUDENTS (The year 2020) Secondary Data

*To answer your assignment 2, You **MUST** review all the sessions (week 01 – week 09) and all the learning materials. This will help you to answer the questions better.*

Kind regards

Navid
