NOVOLOACA (2334049)**

LECTURER NAME: NISHI RAMSURREN

**COURSE NAME: DIGITAL SKILLS (LCLM
4002)**

SESSION: OCTOBER 2024 TERM

BASIC DIGITAL SAFETY

Be SMART! Stay SAFE online!

S

For your **safe**, use a strong password that you can remember that also includes letters, number and special characters. Remember that your password is confidential and must NOT be disclosed to anyone.

M

Be **mindful** of any message or e-mail you receive and DO NOT click on any suspicious links to detect phishing attempts as they may contain viruses and access and steal your personal information. Always check the veracity of a site or received message before accessing links and DO NOT share your details with others

A

Use an **Antivirus** program for higher online protection, as it can warn in real time about unsafe sites and even block unsafe access to any dangerous browsing platform

R

Don't hesitate to **report** anyone who makes you feel uncomfortable and also report and talk about any network that looks suspicious to stop other scams they might be doing.

T

Take a moment and **think** that a person on social media is real. Don't get fooled or share personal details with unknown people on social media as it may be a scam and a plan to steal your identity or personal information.
