

# MARKING CRITERIA and STUDENT FEEDBACK

This section details the assessment criteria. The *extent* to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

| Common Assessment Criteria Applied                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Marks Available | Marks Awarded |

| Although you have a working solution, your approach to annotated code listing is somewhat weak. Please be mindful that code generated by yourself might be used by "other" coders and should have been commented to an adequate standard.                                                                                                                                                                                                                                                                                                                                                                                                                                       | 15              | 5             |
| <b>3. Cognitive and Intellectual Skills</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                 |               |
| You have the basis that explains how the application was developed and your approach to using JS within your mobile app. Although there are code dumps present, you have not fully explained how JS integrates with the various API's - discussion on this would have been useful, you have hard coded elements for the API that should have been carried out via your app e.g., location for the weather API. The positive here, you have managed to get the API working                                                                                                                                                                                                       | 15              | 7             |
| <b>4. Practical Application Skills</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                 |               |
| A basic mobile application that demonstrates a number of API calls and you can process data from those API's. However, elements within the API call are hardcoded, if this was obtained by some users interaction e.g., the weather API when the user selects their location or a geolocation, this would have been a better for the end user. The most curious elements here is that you have managed to get the API working and processed results - so why did you not extend the information gained from the API - or is this an issue with starting the assessment so late. You have also used JQuery mobile to demonstrate your skills, but has not been customised at all | 70              | 28            |
| <b>5. Transferable Skills for Life and Professional Practice</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                 |               |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                 |               |
