

Web Design Rules

1. All file names should start in lower case (NO CAPS!!).
2. Don't use spaces in file names, underscores_are_ok as-are-hyphens or you can use theCamelCaseMethod.
3. Don't start file names with a number.
4. Don't use punctuation in a file name.
5. You must use good file management. Put files in the correct directory.
6. The root file must be called 'index.html'

Root File

The Root File is the first page that the browser will display. The Browser is programmed to search for the index.html file by default.

home.html

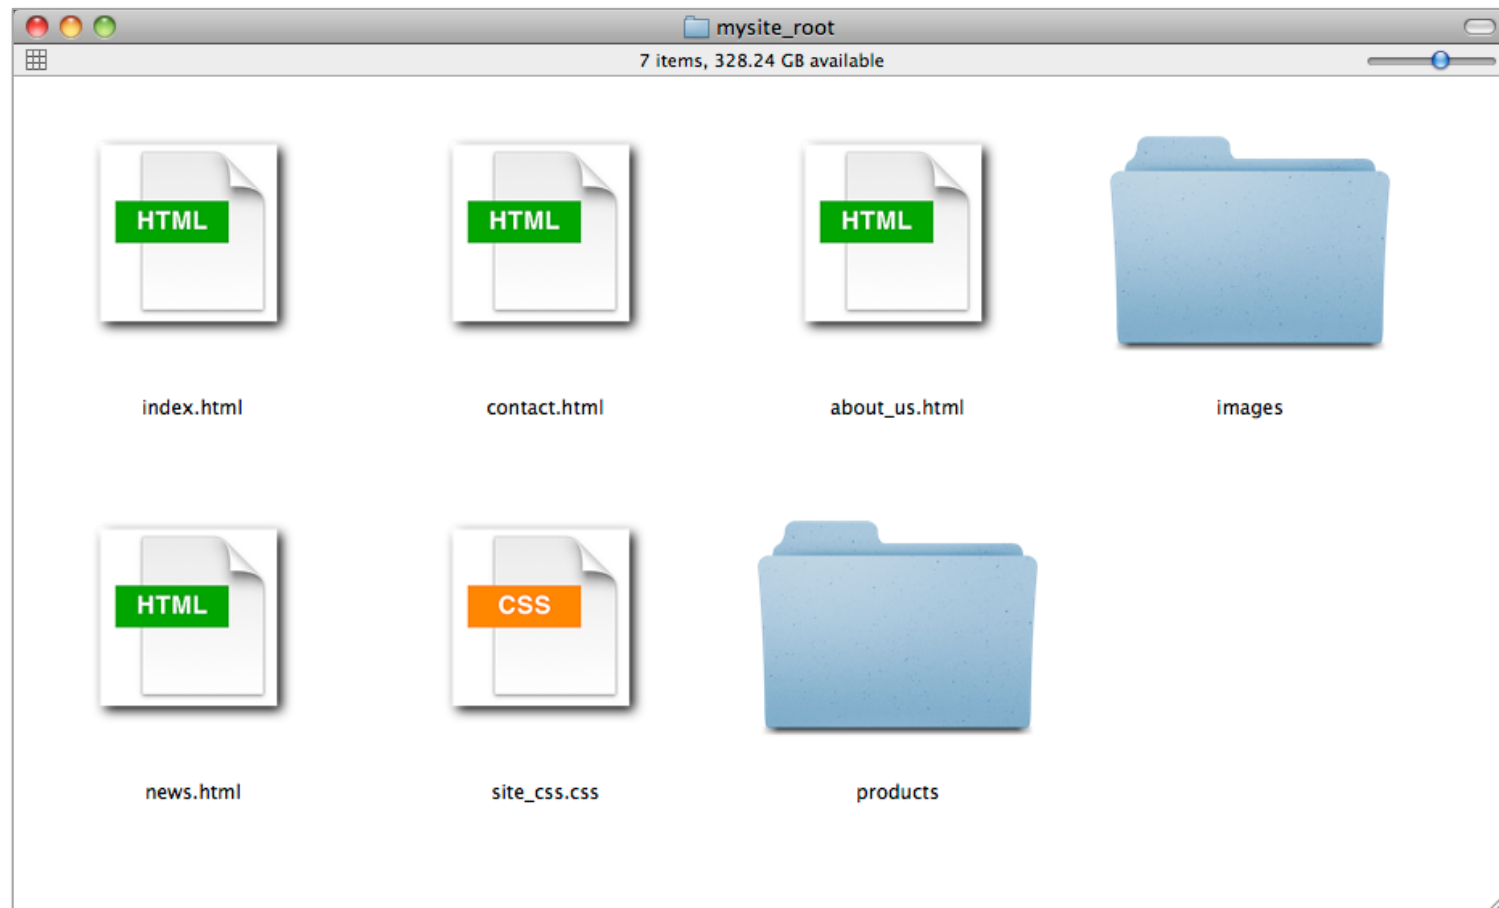

mysite.html

index.html
